Subject: Add Marketing Claims and Update Instructions  
EPA Reg. No. 53735-11  
Amendment Letter dated December 3, 2013

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) is acceptable.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. The next label printing of this product must use this labeling unless subsequent changes have been approved. You must submit one (1) copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

If you have any questions concerning this letter, please contact Elizabeth Watkins at (703) 347-0241.

Sincerely,

A handwritten signature in black ink that reads "Marshall Swindell".

Marshall Swindell  
Product Manager (33)  
Regulatory Management Branch 1  
Antimicrobials Division (7510P)

# POOL FROG MINERAL RESERVOIR

PATENTED MINERAL {POOL} {SPA} {SANITIZER} {DISINFECTANT}

{The Complete Low Chlorine Alternative+}  
{The Complete Low Bromine {or Chlorine} Alternative+}

{The Frog Mineral {System} {Technology} {Formula}+ reduces {chlorine} {bromine} use up to 50%\*}  
{Up To 50%\* Chlorine Reduction with Pool Frog Mineral System}  
{Up to 50% reduction in {bromine} or {chlorine} use\*}

{Eliminates daily dosing for less work}

{The Frog Mineral {System} {Technology} {Formula}+ Improves Water Quality By:}

- {Destroying bacteria for improved clarity}
- {Helping to maintain a neutral pH}
- {Reducing {chlorine} {bromine} use for softer water}

{Frog now comes with water polishers for easier pool start up.} {Now with Start-Up Water Polishers}

## KEEP OUT OF REACH OF CHILDREN

### CAUTION

{See {Side Panel or} Enclosed {Product Label and} Instruction Manual for Complete Directions for Use}

Active Ingredient:

Silver Chloride ----- 0.5%  
 Other Ingredients: ----- 99.5%  
 Total: ----- 100.0%

Net Wt.: \_\_\_\_\_ {lbs} {oz} {grams}  
 EPA Reg. No.: 53735-11  
 EPA Est. No.: xxxxx-xx

4/72

**[Disclosure Statements 1 for Pool Cartridge, Skimmer Application, Pool Cartridge used in Floating System, Floating Pool Cartridge and Cartridge for Bulk Chlorinator]**

+ FROG Mineral {System} {Technology} {Formula} consists of the {FROG} minerals silver chloride and carbonate used in conjunction with 0.5 ppm chlorine. The Pool Frog Mineral Reservoir {cartridge} {pac} must be used in conjunction with {the POOL FROG Bac Pac (EPA Reg. No. 53735-2)}, {an EPA registered chlorine pool product or a chlorine delivery device}.

\*Compared to the minimum EPA recommended chlorine level of 1.0 ppm for a stabilized swimming pool.

**[Disclosure Statements 2 for Spa Cartridge and Filter Spa Product]**

+ FROG Mineral {System} {Technology} {Formula} consists of the FROG minerals silver chloride and carbonate used with 1.0 ppm bromine {or chlorine}. The Pool Frog Mineral Reservoir {cartridge} {pac} must be used in conjunction with {the SPA FROG Bromine Cartridge (EPA Reg. No. 53735-10)}, {an EPA registered bromine {or chlorine} spa product or a bromine {or chlorine} delivery device}.

\*Compared to the minimum ANSI recommended {bromine} or {chlorine} level of 2.0 ppm for a spa.

5/72

## **[Product Description 1 and Directions for Use for Pool Cartridge]**

**Product Description:** The Pool Frog Mineral Reservoir is the heart of an advanced pool care system that destroys bacteria. The patented mineral formula in the Pool Frog Mineral Reservoir also neutralizes acids, which helps keep the pH in an acceptable range with less monitoring. The controlled release of minerals provides an optimum level of protection in your pool. The Frog Mineral {System} {Technology} {Formula}+ reduces chlorine use up to 50%\*. Simply use with at least 0.5 ppm of an EPA registered source of chlorine such as the Pool Frog Bac Pac (EPA Reg. No. 53735-2) or a chlorine delivery device. Using the Pool Frog Mineral {System} {Technology} {Formula}+ improves {swimming pool pleasure} {your swimming experience} by reducing the problems associated with chlorine including faded bathing suits, premature damage to pool equipment or surfaces and smelly odors. With the Pool Frog Mineral Reservoir, pool care is easy and effective. Once wetted, the time-released mineral coating of this product is effective up to 6 consecutive months or one pool season whichever is shorter. After that time, even if upon shaking you hear the spent media inside, it is no longer effective and must be replaced. Mark the calendar with stickers provided to replace this product.

**Replace the Pool Frog Mineral Reservoir after 6 months.**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Directions For Use with chlorine Bac Pac EPA Reg. No. 53735-2:** For use in {in-ground} {above ground} pools up to {15,000} {20,000} {25,000} {30,000} {35,000} {40,000} gallons. For a complete system, use this product inside the {Cycler} {chlorinator} {feeder} along with the chlorine Bac Pac. This product is compatible with pool chemicals except biguanides and bromine. Before inserting the Pool Frog Mineral Reservoir as the pool maintenance product, balance the pH to between 7.2 and 7.8 and total alkalinity between 60-120 ppm and shock the pool with a {chlorine shock per the manufacturer's directions.} {shock pac per its label directions.} Then follow the directions below:

1. Turn circulation pump off, {turn control dial to {Pac Removal}, Setting {0} or {Off} depending on your model and remove cap} {from Cycler} {chlorinator} {feeder}.
2. {Line up slot on the side of the Pool Frog Mineral Reservoir with the fin inside the Cycler and} lower {Pool Frog Mineral Reservoir} into the {Cycler} {chlorinator} {feeder}.
3. If using the chlorine Pac, insert {into the center of this product} according to the directions on its label then replace the cap on the {Cycler} {chlorinator} {feeder} and turn pump back on. {Set the control dial on the {Cycler} {chlorinator} {feeder} per the size and pump run time of your pool according to the chart in the manual.}

**Directions for Use with Alternate Source of Chlorine:** If using an alternative EPA registered source of chlorine, follow steps 1 and 2 above then replace the {Cycler} {chlorinator} {feeder} cap, {set the control dial to {Maximum}, Setting {10} {5} or {On} depending on your model} and turn pump back on. Maintain recommended chlorine levels of at least 0.5 ppm in the pool.

**DO NOT USE ANY OTHER PAC OR BULK CHEMICAL INSIDE THE MINERAL RESERVOIR. DAMAGE TO THE RESERVOIR, POOL OR OTHER EQUIPMENT COULD RESULT.**

6/72

## **[Product Description 2 and Directions for Use for Skimmer Application]**

**Product Description:** Pool Frog Mineral Reservoir destroys bacteria. The patented mineral formula in the Pool Frog Mineral Reservoir also neutralizes acids, which help keep the pH in an acceptable range with less monitoring. The controlled release of minerals provides optimum protection in the pool. The Frog Mineral {System} {Technology} {Formula}+ reduces chlorine use up to 50%\*. Use Pool Frog Mineral Reservoir with at least 0.5 ppm of an EPA registered source of chlorine or a chlorine delivery device. Using the Frog Mineral {System} {Technology} {Formula}+ with reduced chlorine levels improves {swimming pool pleasure} {your swimming experience} by reducing the problems associated with chlorine including faded bathing suits, premature damage to pool equipment or surfaces and smelly odors. With Pool Frog Mineral Reservoir, pool care is easy and effective. Once wetted, the time-released mineral coating of this product is effective up to 6 consecutive months or one pool season whichever is shorter. After that time, even if upon shaking you hear the spent media inside, it is no longer effective and must be replaced.

**Replace the Pool Frog Mineral Reservoir after 6 months.**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Directions for Use:** For in-ground pools up to 25,000 gallons. This product is compatible with pool chemicals except biguanides and bromine. Before using Pool Frog Mineral Reservoir as the pool maintenance product, balance the pH to between 7.2 and 7.8 and total alkalinity between 60-120 ppm and shock the pool with a chlorine shock per the manufacturer's directions. Then follow the directions below:

1. Set reminder dial on Pool Frog Mineral Reservoir to 6 months from date of installation. Turn dial by hand or with a coin if needed.
2. Remove skimmer cover.
3. Remove skimmer basket handle if necessary and {insert} {drop} Pool Frog Mineral Reservoir into the skimmer basket.
4. If using Pool Frog Mineral Reservoir with a suction side automatic cleaner installed through the skimmer, it will be necessary to use a vac plate that may come with the skimmer or automatic cleaner.
5. Once installed, maintain recommended chlorine levels of at least 0.5 ppm in the pool by using an EPA registered source of chlorine approved specifically for swimming pools or a chlorine delivery device.

8/72

**[Product Description 3 and Directions for Use for Pool Cartridge used in Floating System]**

**Product Description:** The Pool Frog Mineral Reservoir destroys bacteria while the patented mineral formula also neutralizes acids which helps keep the pH in an acceptable range with less monitoring. The controlled release of minerals provides an optimum level of protection in your pool. The Frog Mineral {System} {Technology} {Formula}+ reduces chlorine use up to 50%\*. Simply use the Pool Frog Mineral Reservoir with at least 0.5 ppm of an EPA registered source of chlorine or a chlorine delivery device. Using the Pool Frog Mineral {System} {Technology} {Formula}+ with reduced chlorine levels improves {swimming pool pleasure} {your swimming experience} by reducing the problems associated with chlorine including faded bathing suits, premature damage to pool equipment or surfaces and smelly odors. With the Pool Frog Mineral Reservoir, pool care is easy and effective.

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Directions for Use:** For use in small above ground pools {up to 4000} {between 4000 and 9000} {up to 9000} gallons. Use this Pool Frog Mineral Reservoir with the Pool Frog Chlorine Cartridge in the Frog Splash System. Ensure all equipment is working properly according to the pool manufacturer. For best results, balance pH to between 7.2 and 7.8.

**Setting Pool Frog Mineral Reservoir:** While holding the bottom of the cartridge, turn the top until the number 6 appears in the setting window.

**Using the Frog Splash System:** Push the Pool Frog Mineral Reservoir into the bottom opening of the floating Frog Splash System. For best results, insert the Pool Frog Chlorine Cartridge (EPA Reg. No. 53735-2) into the other opening. Set entire system in the pool water.

8/72

**[Product Description 4 and Directions for Use for Spa Cartridge]**

For use in the {In-Line System} {or the} {Floating System}

**Product Description:** The Pool Frog Mineral Reservoir contains a patented mineral formula that destroys bacteria while neutralizing acids, which helps keep the pH in an acceptable range with less monitoring. Using the Frog Mineral {System} {Technology} {Formula}+ with reduced levels of bromine {or chlorine} improves spa pleasure {by reducing the problems associated with bromine {or chlorine} including faded bathing suits, premature damage to spa equipment or surfaces and smelly odors}.

**Replace the Pool Frog Mineral Reservoir after 4 months or when draining and refilling spa with fresh water.**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Directions for Use:** For use in spas up to {500} {600} gallons. Use this Pool Frog Mineral Reservoir with the Spa Frog Bromine Cartridge in {either} the {In-Line System} {or} {Floating System}. Ensure all spa equipment is working properly. Operate the pump and filter for at least 3 hours per day. Clean filter following manufacturer's directions. Adjust pH to between 7.2 – {7.6} {7.8}. With a freshly filled spa, establish a bromine or chlorine residual of 1.0-2.0 ppm with {an EPA approved spa shock} {or by other means} {a start-up spa shock packet}. Always maintain a bromine {or chlorine} residual of at least 1.0 ppm. Shock spa once a week or as needed. When using other products as outlined in directions for this product, always follow directions on those products. Keep the spa free of leaves and debris.

**Setting Pool Frog Mineral Reservoir:** While holding the bottom of the cartridge, turn the top until the number 6 appears in the setting window. This cartridge may be used in {one of} the following application{s):

**{Using the In-Line System:** Open cap of In-Line System. Push down and turn cartridge holder counter-clockwise to unlock. Pull holder out. Snap the Pool Frog Mineral Reservoir into the area marked "Minerals" (top portion) making sure to line up the indentation near the top of the cartridge with the raised line on the holder. For best results insert the SPA FROG Bromine Cartridge (EPA Reg. No. 53735-10) in the area marked "Bromine" (bottom portion). When cartridge is snapped in, replace holder by lining up arrow on handle with arrow on system lip, push down and lock in place. Replace cap.}

**{Using the Floating System:** Push the Pool Frog Mineral Reservoir into the bottom opening of the floating Spa Frog system. For best results insert the Spa Frog Bromine Cartridge (EPA Reg. No. 53735-10) into the other opening. Set entire system in the spa water.}

9/72

## **[Product Description 5 and Directions for Use for Filter Spa Product]**

**Product Description:** Pool Frog Mineral Reservoir contains a patented mineral formula that destroys bacteria while neutralizing acids, which helps keep the pH in an acceptable range with less monitoring. Using the Frog Mineral {System} {Technology} {Formula}+ with reduced levels of bromine {or chlorine} improves spa pleasure {by reducing the problems associated with bromine {or chlorine} including {faded} {fading} bathing suits, premature damage to spa equipment or surfaces and smelly odors}.

**Replace Pool Frog Mineral Reservoir after 4 months or when draining and refilling spa with fresh water.**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Directions for Use:** For use in spas up to {500} {600} gallons. Ensure all spa equipment is working properly. Operate the pump and filter for at least 3 hours per day. Clean filter following manufacturer's directions. Adjust pH to between 7.2 – {7.6} {7.8}. With a freshly filled spa, establish a bromine or chlorine residual of 1.0-2.0 ppm with {an EPA approved spa shock} {or by other means} {a start-up spa shock packet}. Always maintain a bromine {or chlorine} residual of at least 1.0 ppm. Shock spa once a week or as needed. When using other products as outlined in directions for this product, always follow directions on those products. Keep the spa free of leaves and debris.

**Installing Pool Frog Mineral Reservoir:** {Set reminder dial to four months from month of installation. Turn dial by hand or with a coin if needed.} {Mark your calendar with enclosed reminder sticker for the 4 month replacement date.} {Set for 4 months} Place Pool Frog Mineral Reservoir in one of the following locations:

- a. Majority of Spas: insert Pool Frog Mineral Reservoir inside filter cartridge core. Do not allow product to sit too low in the filter. If blocking water flow, install in filter well. If installed inside a standpipe, attach a string to the {handle on top} {Frog head handle} for easy removal.
- b. High Flow Spas: on skimmer filters with 2.5 HP or larger pump motors, place Pool Frog Mineral Reservoir in filter well outside the filter cartridge.
- c. Small Cartridge or Other Spas: place Pool Frog Mineral Reservoir in skimmer tray.

## **[Product Description 6 and Directions for Use for Floating Pool Cartridge]**

**Product Description (For Pool Frog Mineral Reservoir Mineral(s) (Cartridge)):** Pool Frog Mineral Reservoir is {part of a complete pool care system} {mineral sanitizing pool care} {pool care with sanitizing minerals} {sanitizing mineral pool care} {for {pop up} {splasher} {small above ground} {easy set} {quick set} {metal frame} {oval frame} {ultra frame} {frame} {set} pools} that {uses the} {utilizes a} patented mineral formula with {low(er)} {reduced} levels of chlorine to destroy bacteria, help maintain {a neutral} pH {with less monitoring} and restore water clarity. Use with the chlorine {half} {hemisphere} {replacement} {cartridge} {pac} {recharge} and simply {connect,} {turn} {twist} to set {and} {then} {toss into} {plop in} {tether to} the pool. Everything is prefilled and contained {{for} no mess, no guess {and} no stress {pool care}}. {The best part is it flips over when {empty} {out} {time to replace a {chlorine} cartridge.} {Hey! Less Work Hey! Less Chlorine Hey! Less Money}. {Plus minerals reduce chlorine use up to 50% which {helps} prevent{s} faded {bleached} {swim}suits, premature damage to pool equipment of surfaces and smelly odors}.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**Directions For Use:** For use in pools {up to {12'} {15'} {16'} {18'} {20} {21} in diameter} {or} {approximately {3000} {4000} {5000} {6000} {8000} {10,000} gallons} {between {1000} {2000} {5000} and {5000} {6000} {10,000} gallons}. {Not recommended for pools under {1000} {2000} {5000} gallons}. {Use one per {5000} {10,000} gallons.} {Check the package to ensure you have the right Pool Frog Mineral {Reservoir} {System} {or} {chlorine recharge} {cartridge} for your size pool.} Ensure all pool equipment is working properly with adequate circulation per the pool manufacturer. Balance the water's pH to between 7.2 and 7.8. Shock pool to remove contaminants (follow manufacturer's directions).

### [Assembly Option #1]

{To assemble: Remove the outer packaging {before using {the Pool Frog Mineral {Reservoir} {System} {or} {chlorine recharge} {this cartridge}}. Bring the {gray} {green} {blue} mineral and {blue} {yellow} chlorine {halves} {hemispheres} {cartridges} {pacs} {pieces} {sections} together {with} {arrows} {alignment marks} {tick marks} {icons} {water drops} aligned along the edge of both {halves} {cartridges}} {with the arrow on the chlorine cartridge lined up with the unlock symbol on the mineral cartridge} {(see Figure A)}. Rotate the two {halves} {hemispheres} {cartridges} {pacs} {pieces} {sections} opposite of each other {(see Figure B)} until the {recommended} initial setting for your pool size {appears in the setting window} {is lined up with the {arrow} {alignment mark} {tick mark} {icon} {water drop}.} {see Figure C)} {(see chart in {FROG System} manual)}. {For example, the} most common pool size {of} 15' {diameter}, 4000 gallons {would start on} setting #5.

Once set, place directly in the pool. {With the cord provided} Tether it to the pool {side} or ladder {with {a string} {the cord} {provided} through the {loop} {hole} in the product}. Initially test {the} water {daily} {for chlorine} {using} {with} FROG {Brand} Test Strips {or a recognized swimming pool test kit or testing device}. Adjust the system up or down by one setting per day until the ideal free available chlorine (FAC) range of 0.5 to 1.0 ppm is maintained. {You may remove} product from pool when in use}}

### [Assembly Option #2]

{To assemble: Remove outer packaging

- Align arrows on {gray} {green} {blue} mineral and {blue} {yellow} chlorine cartridges (see Figure A {below})
- Push together and rotate to connect (see Figure B {below})
- Find setting from initial setting chart (see Figure C {below})
- Lock in setting and place in pool
- Attach cord and tether to pool or ladder
- Maintain 0.5 to 1.0 ppm free chlorine level
- Initially test water with {Frog} Test Strips daily
- Adjust setting if needed one number per day

- 11/72
- {Product may be removed when pool is in use} {Remove product when pool is in use}}
  - Shock pool as needed to maintain water clarity

When the {complete Frog System} {Pool Frog Mineral Reservoir} {flips} {rolls} over the chlorine {half} {cartridge} is empty and must be replaced. To remove, {rotate the two {halves} {hemispheres} {cartridges} {pacs} {pieces} {sections} until the {arrows} {alignment marks} {tick marks} {icons} {water drops} align along the edge of both {halves} {cartridges} (see Figure A) and pull apart}. If the Pool Frog Mineral Reservoir has not been used for 6 months or one pool season whichever is shorter, simply attach a new chlorine {brand} {half} {hemisphere} {replacement} {cartridge} {pac} {recharge} and set the complete system back in the water. Do not allow chlorine cartridge to sink to the bottom or pool bleaching may occur.

If the chlorine {brand} {half} {hemisphere} {replacement} {cartridge} {pac} {recharge} still contains a small amount of chlorine after the system has {flipped} {rolled} over, place in pool until completely empty. {Once the Pool Frog Mineral Reservoir has been used for 6 months or one pool season whichever is shorter, the minerals are no longer active. Replace the entire Pool Frog Mineral {System} {Reservoir} and discard the mineral {half} {hemisphere} {cartridge} {pac} {piece} {section} in the trash.}

## [Product Description 7 and Directions for Use for Cartridge for Bulk Chlorinator]

**Product Description:** Pool Frog Mineral Reservoir is part of a complete pool care system that works inside an {Hayward®} {Rainbow®} chlorinator utilizing a patented mineral formula with low levels of chlorine to destroy bacteria, help maintain pH and restore water clarity. The Frog Mineral {System} {Technology} {Formula}+ reduces chlorine use up to 50%\*. Simply use with the Chlorine Pac (EPA Reg. No. 53735-2) by {attaching} {connecting} {latching} the two pacs together and inserting in the center of a {Hayward®} {Rainbow®} {or equivalent} chlorinator. Using the Pool Frog Mineral {System} {Technology} {Formula}+ improves {swimming pool pleasure} {your swimming experience} by reducing the problems associated with chlorine including faded bathing suits, premature damage to pool equipment or surfaces and smelly odors.

**Replace the Pool Frog Mineral Reservoir after 6 months.**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Directions For Use:** For use inside {Hayward®} chlorinator models CL200 and CL220} {Rainbow®} chlorinator models 300 and 320} {or equivalent chlorinators} for pools up to {10,000} {15,000} {20,000} {25,000} {30,000} {35,000} {40,000} gallons. Pool Frog Mineral Reservoir must be used with the Chlorine Pac. Before using, balance the pH to between 7.2 and 7.8 and total alkalinity between 60-120 ppm and shock the pool with a {chlorine shock per the manufacturer's directions.} {shock pac per its label directions.} Make sure the chlorinator is completely empty of chemical. Never mix chemicals. If used previously with a chemical other than Trichlor, clean inside of chlorinator thoroughly. Then follow the directions below:

1. {Remove {tape} {foil} covering the water holes on the bottom and {side of}} {Remove plug from side of} the chlorine pac.
2. Connect the Pool Frog Mineral Reservoir to the Chlorine Pac by bringing the two pieces together, lining up the arrows and turning the chlorine pac clockwise until locked in place.
3. Turn circulation pump off, turn the {Hayward®} {Rainbow®} chlorinator dial to off and remove its cap.
4. {Lift} {Use} handle {and} {to} insert the complete system into the {Hayward®} {Rainbow®} chlorinator by lining up the short square channel on the Pool Frog Mineral Reservoir with the dial side of the chlorinator. Lower until seated. The cap will not close properly if the product is not seated correctly. Lift up and reinsert until seated properly.
5. Replace the cap on the {Hayward®} {Rainbow®} chlorinator and turn pump back on. Set the control dial according to the chart in the manual. When using the Pool Frog Mineral Reservoir maintain a free available chlorine (FAC) level of 0.5 ppm to 1.0 ppm. Adjust the chlorinator dial to increase or decrease chlorine output.
6. {If using Algaecide Pac. Before attaching the Chlorine Pac (step 2) {push} {screw} {affix} {insert} algaecide {pac} {container} {bottle} {on} {in} to the {chlorinator} {adapter that attaches to the} {Pool Frog Mineral Reservoir} {while inside the chlorinator} {then insert into chlorinator}. Replace cap, turn dial full open and run for 90 minutes. Remove algaecide bottle and discard or recycle.}

**[Disposal Statement 1 for Pool Cartridge, Skimmer Application, Pool Cartridge used in Floating System, Floating Pool Cartridge and Cartridge for Bulk Chlorinator]**

**Disposal:** After six months of use, discard Pool Frog Mineral Reservoir {mineral cartridge} in trash even if it appears there is spent media left inside. Non-refillable container. Do not reuse or refill this container. {Do not attempt to reuse the {Reservoir} {cartridge} {pac} {hemisphere} {replacement} once removed from the {Frog Cyclor} {skimmer} {floating Frog system}{pool.} In the unlikely event that a {Reservoir} {cartridge} {pac} {hemisphere} {replacement} should break and release raw minerals into the pool - vacuum out.

**[Disposal Statement 2 for Spa Cartridge and Filter Spa Product]**

**Disposal:** After four months of use, or when draining and refilling the spa with fresh water, discard Pool Frog Mineral Reservoir in trash even if, upon shaking, it appears there is spent media left inside. Once wetted the time released minerals in the cartridge are effective up to four months. Non-refillable container. Do not reuse or refill this container. {Do not attempt to reuse the product once removed from the spa.}

{NOTICE: Neither King Technology, Inc. nor the seller of this product can accept any responsibility where the product is not used according to directions and for the manner in which it was intended.}

{NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.}

**[Operational Instructions 1 for Pool Cartridge]**

[All text is optional]

**POOL FROG Mineral Reservoir:  
Patented Mineral Pool {Sanitizer} {Disinfectant}**

**Operational Instructions**

**REPLACE {Mineral Reservoir} EVERY 6 MONTHS OR  
AFTER ONE POOL SEASON WHICHEVER IS SHORTER.**

**Swimming Pool Tips**

1. Make sure the pool has adequate circulation. The pool water must completely circulate through the pump and filter at least 1 to 2 times per day. This usually requires 8 to 12 hours. Check with your dealer for the proper circulation time for your pool.
2. Before beginning with any pool care program, you must first balance your pool water. Take a water sample to your local pool professional {or use a complete test kit} that will test for the following important elements.

Water Balance Guidelines	
pH:	7.2-7.8
Total Alkalinity:	60-120 ppm
Calcium Hardness:	150-400
Total Dissolved Solids:	<1500
Stabilizer:	20-80 ppm
Free Chlorine:	0.5-1.0 ppm

3. If your fill water is high in metals, use a sequestering agent or metal out product at start up only before using the mineral reservoir. See your local dealer for details on using these products and always follow manufacturer's directions carefully.
4. After your pool is up and running smoothly, continue to test your water for pH, total alkalinity and chlorine {with FROG Brand Test Strips} and maintain its balance by adding any necessary adjustment products (see you dealer for details).
5. Check the pool's filter gauge often and periodically clean filter per the manufacturer's directions. A dirty filter will slow the flow of water which could hamper proper circulation.

**{How to replace the Pool Frog components}**

**{Replacing} {Using} a POOL FROG Mineral Reservoir, {FROG BAM} and {Bac Pac} or {Chlorine Pac}**

1. {Check the {top} {front} of the box {and {back} label of product to} make sure you have the correct POOL FROG Mineral Reservoir to fit your {POOL FROG Cycler} {chlorinator} {feeder}. The colored barcode will indicate {if it fits in ground versus above ground.} {how many gallons it will handle.} {Above Ground Series XXXX or In Ground Series XXXX for use with Cycler Models XXXX and XXXX.}} {The POOL FROG Mineral Reservoir fits in the

{FROG Leap Infuzer Model XXXX} {and the} {POOL FROG Cyclor Models XXXX and or XXXX.}

THE POOL FROG MINERAL RESERVOIR MUST BE REPLACED EVERY 6 MONTHS OR AFTER ONE POOL SEASON WHICHEVER IS SHORTER.

- 2. {{Once you have determined you have the right mineral reservoir,} open the box and remove the POOL FROG MINERAL RESERVOIR.}

IMPORTANT: Remove and read the inserted information card.

{CAUTION read carefully –

USE ONLY the factory recommended replacement POOL FROG Mineral Reservoir, {algaecide pac} {shock pac} {algaecide and shock pacs} {FROG BAM} and Bac Pac. DO NOT USE any other pac or bulk chemical tablets in the cyclor {or put anything inside other than the appropriate {Frog Leap} or {Pool Frog} product as directed in the product instructions}. Use of any other product could result in damage to pool equipment or surface, unsafe pool conditions, fire or explosion. Warranty will be void if the correct POOL FROG Mineral Reservoir, {algaecide pac} {shock pac} {algaecide and shock pacs} {FROG BAM} and Bac Pac are not used.}

- 3. Turn off pump {and turn dial to {Pac Removal}, Setting {0} or {Off} depending on the model.} {turn dial to lowest setting.}
- 4. Open cap, if using {bac pac} {chlorine pac} stand back to avoid inhaling chlorine fumes.
- 5. {Find slot on side of POOL FROG Mineral Reservoir and line up with fin inside the cyclor.} {Pull up on Bac Pac to {remove} {disconnect} old Reservoir and discard in trash.} {Insert Bac Pac inside new reservoir.} {Push together until parts connect.} Lower {POOL FROG Mineral Reservoir} into {cyclor} {chlorinator} {feeder} until secure.  
Slot it Pool Frog Mineral Reservoir  
Fin inside {cyclor} {chlorinator} {feeder}

**{{Replacing} {USING} FROG BAM {FOR AN ALGAE-PROTECTION GUARANTEE**  
(If you are not using FROG BAM proceed to Step 12.)}

For a preventative dose, add one FROG BAM for pools up to 15,000 gallons or two FROG BAM for pools between 15,000 and 30,000 gallons.

See FROG BAM product labeling for complete directions for use (EPA Reg. No. 53735-9).

- 1. Remove cap from FROG BAM without removing seal. {NOTE: Wait 24 hours after shocking before using FROG BAM. Avoid adding other chemicals until this product has been circulated (filtered) for at least 24 hours.} If Bac Pac is currently being used inside the mineral reservoir, remove and set aside.
- 2. {Insert upside down into center of POOL FROG Mineral Reservoir} {Insert FROG BAM into center of reservoir {pushing together until parts connect} and lower into {cyclor} {chlorinator} {feeder} pushing down firmly on key to puncture seal.
- 3. Replace cap by hand only. DO NOT OVER TIGHTEN. {Turn control dial {on cyclor} to {Maximum}, Setting {10} {5} or {On} depending on the model.} {highest setting.}
- 4. Turn pump on for 90 minutes allowing FROG BAM to circulate through pool.

- 5. To remove FROG BAM, turn pump off, turn dial to {Pac Removal}, Setting {0} or {Off} depending on the model, {lowest setting} remove {cyclor} cap.
- 6. Lift FROG BAM up and allow any water in the container to drain through the {cyclor} {chlorinator} {feeder}, {remove} {disconnect} from Reservoir} before recycling or discarding in trash.

NOTE: If water shows more than a hint of blue inside cyclor, replace the {cyclor} {chlorinator} {feeder} cap, {turn dial to {Maximum}, Setting {10} {5} or {On} {highest setting}} and run the pump for one minute.

- 11a. If pool size requires additional FROG BAM, repeat steps x-x.
- 11b. When water is clear in {cyclor} {chlorinator} {feeder}, proceed to step x.} {install Bac Pac}

**{Replacing} {USING} THE {BAC PAC} {Chlorine Pac} {Non-Chlorine Shock Pac} {Chlorine Shock Pac}**

{Pool Frog Bac Pac for use in the in ground and above ground systems}  
 {Pool Frog Pac 540C for use in the XL Pro Chlorine Cyclor}  
 {Pool Frog Pac 610C for use in the dual {25K} {System} chlorine cyclor {Pool Frog Twin}}  
 {Non-Chlorine Shock Pac is a one-time start-up product used to rid the water of contaminants. Chlorine Shock Pac also used at start up, sets the chlorine residual to help find the proper dial setting from maintaining up to 50%\* less chlorine while using the chlorine Bac Pacs (EPA Reg. No.: 53735-2). All products sold separately.}

- 1. {Bac Pac} {Chlorine pacs} are recommended to assure up to 50%\* reduction in chlorine use. *Pacs sold separately.* (EPA Reg. No. 53735-2)

*\*Compared to the minimum EPA recommended chlorine level of 1.0 ppm for a stabilized swimming pool.*

Avoid sparks, open flame or smoking when handling the {non-chlorine shock pac, chlorine shock pac or} bac pac.

- 2. Open Pac
  - 2a. Pool Frog Bac Pac
    - {To} {For Bac Pac,} remove colored tabs {by grabbing} {grab} on to the lip of one cap {with a pliers} and {pulling} {pull} up until cap releases. Repeat the process for the other cap.

- 2b. Pool Frog Pac 540C and 610C
  - For 540C and 610C pacs, find the indent in the plastic handle and cut using a 2" PVC cutter or hacksaw. Either way, make sure the blade comes straight across on the indent line for a clean cut. If openings are pinched together, open with fingers or re-cut closer to the colored screens inside the Pool Frog Pac. Leave at least 1/4" of plastic to fit into the Pool Frog Cyclor.

Avoid pinched opening  
 A correct oval opening

- 3. {Turn {bac} pac over} {invert pac} and shake slightly until {chlorine tablets} {ingredients} fall into tower areas.
  - Bac Pac Towers
  - 540C Pac Towers
  - 610C Pac Towers

- 4. Insert Pac into Cyclor
  - 4a. Pool Frog Bac Pac.

{For Bac Pac,} {line up the small leg with small opening in the POOL FROG Mineral Reservoir and large leg with the large opening.} {Insert into center of reservoir.} {Push together until snapped in place.} Lower {pac} into {cyclor} {chlorinator} {feeder} {POOL FROG Mineral Reservoir} until secure.

4b. Pool Frog Pac 540C and 610C .

For 540C or 610C line up the openings in the pacs with the keys in the Pool Frog Chlorine Cyclor. Note; Qpenings are a different shape than keys. Lower pac until secure.

Opening in Pool Frog Pac

Key in Pool Frdg Cyclor

Pool Frog Mineral Cyclor

Pool Frog Chlorine Cyclor

- 5. Replace cap by hand only. DO NOT OVER TIGHTEN.
- 6. Run the pump and filter for each pac according to the directions on the product label. Remove from the {cyclor} {chlorinator} {feeder} when empty and discard or offer for recycling..

The {chlorine} pacs are made if HDPE plastic. Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. Rinse thoroughly before recycling or discarding in trash.

Mark your calendar for the six month replacement of the POOL FROG Mineral Reservoir, {90-day replacement of FROG BAM} and approximate replacement times for the {Bac Pac{ {Pool Frog Pacs}. Once wetted, the time released mineral coating of this product is effective up to 6 consecutive months or one pool season whichever is shorter. After that time, even if you hear the spent media inside, it is no longer effective and must be replaced.

**Start-up and Operation**

**Pool Frog Mineral Reservoir {now with Start-up Water Polishers for easier start up.}**

- 1. Add a stabilizer or conditioner to the pool at the beginning of the season if the stabilizer level is below 20 ppm. This will prevent chlorine burn off. Follow manufacturer's directions carefully.
- 2. {Shock the pool with {an EPA registered chlorine shock} {a shock pac} to rid the water of all contaminants before beginning. Follow manufacturer's directions carefully.}

{If using standard chlorine shock} Do not add shock in or near the skimmer or into the {cyclor} {chlorinator} {feeder} as it could damage equipment, risk potential explosion or discolor your pool surface.

**THIS STEP IS VERY IMPORTANT TO START-UP. USE CHLORINE SHOCK ONLY.**

- 3. {Insert an algaecide pac to complete the start-up process. (See pg x for directions.)}
- 4. Install POOL FROG Mineral Reservoir into the {cyclor} {chlorinator} {feeder}. (See page x for directions.)

**REPLACE THE POOL FROG MINERAL RESERVOIR EVERY 6 MONTHS OR AFTER ONE POOL SEASON WHICHEVER IS SHORTER.**

- 5. Replace cap and run {cyclor} {chlorinator} {feeder}, with POOL FROG Mineral Reservoir inserted, for 10 minutes {on setting {Maximum}, Setting {10} {5} or {On} depending on the model} {highest setting}.

6. {Shock the pool with {potassium monopersulfate} {non-chlorine shock pac} to rid the water of all contaminants. (See page x for directions.)}
7. {Create a chlorine residual with {an EPA registered chlorine shock} {a chlorine shock pac} {See page x for directions.} This step is very important {to start-up.} Always begin with chlorine in the pool water.}
8. {Test the water before adding FROG BAM} {For a 90 day algae protection guarantee {When the pH is between 7.2-7.8 and the chlorine level is no more than 4.0 ppm,} Insert FROG BAM into POOL FROG Mineral Reservoir {in cyclor} {chlorinator} {feeder}. (See page x for directions.)}
9. When chlorine reading is down to 1.0 ppm, which may take a few days, insert chlorine {bac} pac. (See {left column} {page x} for directions.)

**{FOR IN GROUND MODELS}**

For In Ground models, cap removal is easier if using the tool included with the cyclor. To loosen cap, hit the handle with the flat of your hand counter clockwise.  
**DO NOT USE CAP TOOL TO TIGHTEN CAP.**

**Start-up and Operation**

**{This system is designed to work effectively with a variety of pool equipment as long as the following basic procedures are followed.}**

10. **SETTING CONTROL DIAL** Set control dial by matching up the parameters of your pool on the charts below. THIS IS A STARTING POINT ONLY and may need to be adjusted to fit your individual pool needs. See # {x} for directions.

Above Ground POOL SIZE Gallons Diameter	8 HOUR PUMP RUN TIME				12 HOUR PUMP RUN TIME				24 HOUR PUMP RUN TIME

\* - Bypass installation recommended.

NR - This pump size is not recommended for this size pool.

**{IMPORTANT: Pump run times of at least 6 hours at high speed are recommended for proper performance. If running low speed only or on high speed less than 6 hours, please follow the 24 Hour Low Speed directions below:**

**24 HOUR, LOW SPEED PUMP RUN TIME**

In order to ensure proper performance when running on low speed for 24 hours or high speed less than 6 hours, bleed the air while the pump is on by unscrewing the cap knob until water appears. Then screw the knob back on. Repeat this process each time the cap is removed for any reason.

Set the control dial at #6 and follow the adjustment directions in Step x to determine the correct setting for your pool.

- 11. For the first week test the pool water daily for free chlorine {with Frog Brand Test Strips} to ensure correct dial setting. Continue to test weekly throughout the season. After testing, adjust the dial up by ½ increment if the free chlorine reading has dropped below 0.5 ppm or down by ½ increment if the reading has risen above 1.0 ppm. Continue this process each day until the {reading stabilizes to at least 0.5 ppm.} {color on the test strip matches the ideal Frdg range of 0.5 ppm to 1.0 ppm chlorine.} Remember to adjust dial by ½ increments only, in order to prevent over chlorination which may bleach pool surfaces.
- 12. Shock pool every two weeks or as needed to maintain water quality. Follow label directions on the chlorine shock treatment used.
- 13. {Before closing the pool for winter, use the {algaecide pac} {shock pac} {algaecide and shock pacs} following the {directions on the pac label} {same directions as pool start up on page x.}}

**If using another means of chlorine**

Follow steps 1-5 on Start-up and Operation and then continue below.

- 6. {Maintain setting of {Maximum}, Setting {10} {5} or {On} depending on the model} {highest setting} {Set wide open.} No adjustments needed.
- 7. Maintain a minimum chlorine reading of 0.5 ppm with a chlorine delivery device or hand feeding.
- 8. Shock pool every two weeks or as needed to maintain water quality. Follow label directions on the chlorine shock treatment used.

For an easy two-step pool closing program, use Shock Pac and Frog Bam following directions above.

**[Operational Instructions 2 for Skimmer Application]**

**[All text is optional]**

**POOL FROG MINERAL RESERVOIR**

**Patented Mineral Pool {Sanitizer} {Disinfectant} Instruction Manual**

ELIMINATES DAILY DOSING FOR LESS WORK

SPARKLING WATER FOR IN GROUND POOLS

**Specifications**

For in ground pools ONLY.

Lasts 6 months once product is wetted.

Easy to set reminder dial for product replacement.

Reduces chlorine use up to 50%\*

(With chlorinator or floater turn setting down or use fewer tablets.)

**Pool Start Up**

1. Balance water according to the chart.

<b>Water Balance Guidelines</b>	
pH:	7.2-7.8
Total Alkalinity:	60-120 ppm
Calcium Hardness:	150-400
Total Dissolved Solids:	<1500
Stabilizer:	20-80 ppm
Free Chlorine:	0.5-1.0 ppm

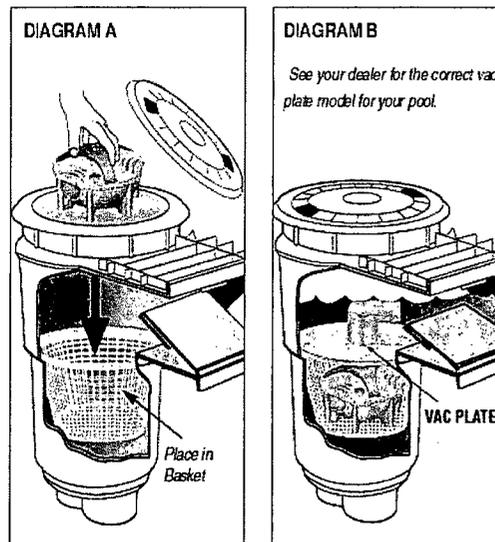

2. Shock pool to remove all contaminants. (Follow manufacturer's directions.)

*\*Compared to the minimum EPA recommended chlorine level of 1.0 ppm for stabilized swimming pool.*

Thank you for purchasing the Pool Frog Mineral Reservoir. With mineral pool care, your water will feel softer, shine brighter while reducing chemicals and overall pool maintenance.

### Installing a Pool Frog Mineral Reservoir

1. Set reminder dial on the Pool Frog Mineral Reservoir to 6 months from date of installation. Turn dial by hand or with a coin if needed.
2. Remove skimmer cover and skimmer basket handle if applicable. Insert the Pool Frog Mineral Reservoir into skimmer basket. **DIAGRAM A**
3. If using the Pool Frog Mineral Reservoir with a suction side automatic cleaner installed through the skimmer, it will be necessary to use a vac plate that may come with the skimmer or automatic cleaner. **DIAGRAM B**

### Regular Pool Care

1. Run pump and filter at least 8 hours per day.
2. Regularly test water for pH, total alkalinity and chlorine levels.
3. Maintain at least 0.5 ppm chlorine level at all times. A chlorinator or floater is recommended. If using chlorine pucks in the skimmer basket, place them under the Pool Frog Mineral Reservoir.
4. Shock pool every two weeks or as needed to maintain water quality. Follow label directions on the chlorine shock treatment used.
5. Check filter gauge regularly and clean or back-wash when needed per the manufacturer's directions.
6. Periodically clean skimmer basket of excess debris as normal.
7. REMEMBER TO REPLACE THE POOL FROG MINERAL RESERVOIR EVERY 6 MONTHS OR AFTER ONE POOL SEASON WHICHEVER IS SHORTER.

**[Operational Instructions 3 for Pool Cartridge used in Floating System]**  
**[All text is optional]**

**POOL FROG Mineral Reservoir OPERATING INSTRUCTIONS**

Congratulations for purchasing {the Frog Splash System}—the complete mineral and chlorine disinfecting system. When using the patented Pool Frog Mineral Reservoir with the proprietary Pool Frog Chlorine Cartridge you'll enjoy your pool more with less work and less chlorine.

Less work because:

- The Frog Mineral {System} {Technology} {Formula}+ continuously works to destroy bacteria for six {full} months.
- Cartridges last longer to eliminate daily maintenance.
- Cartridges are pre-filled for no measuring and no mess.
- Simply adjust to your setting and relax for weeks.

Less chlorine because:

- With minerals in the water, chlorine use is cut up to 50%\*
- With minerals and low levels of chlorine, the water feels softer.
- The system reduces odors and leaves the water crystal clear.

You're going to love your {Frog Splash} System. If you have any questions, contact our customer service representatives at 800-222-0169.

\* Compared to the minimum EPA recommended chlorine level of 1.0 ppm for a stabilized swimming pool.

**Pool Start Up**

- Clean and replace filter cartridges when dirty (follow manufacturer's instructions)
- Balance water according to the chart

<b>Water Balance Guidelines</b>	
pH:	7.2-7.8
Total Alkalinity:	60-120 ppm
Calcium Hardness:	150-400
Total Dissolved Solids:	<1500
Stabilizer:	20-80 ppm
Free Chlorine:	0.5-1.0 ppm

NOTE: Chlorine levels are lower only when used with Frog minerals

- Very Important: Before using cartridges, establish an initial chlorine residual of 1.0 ppm with a chlorine shock. DO NOT use a non-chlorine shock. Use {the appropriate chlorine test strips or kit and follow manufacturer's instructions.} {Frog Brand Test Strips to accurately maintain the reduced 0.5 to 1.0 ppm chlorine level following the label directions carefully.}
- Begin regular pool care procedures (see back page) as soon as start up is complete.

**Setting Cartridges**

- Set the mineral cartridge to wide open on #6 by holding the bottom and turning the top until the number 6 appears in the setting window. No further adjustments are necessary.
- Set the chlorine cartridge to an appropriate starting setting depending on pool size {by holding the bottom and turning the top of the cartridge until the desired number appears in the setting window}. {For pools 1000 gallons or less begin on setting 1 or 2.} {For larger pools {up to 4000 gallons} begin on setting 3.} {For pools up to 9000 gallons, begin on setting 5.} Initially monitor chlorine levels daily until at least 0.5 ppm is maintained. Adjusting to a higher setting will increase chlorine output while a lower setting will decrease it. NOTE: if the setting is too high, bleaching of pool liners may occur in smaller pools.

**Using the {Frog Splash} System**

- Insert both cartridges into the floating holder by pushing them into the openings until they stay in place.
- Let the system free float in the pool.
- When using the pool, simply remove the system, drain most of the water into the pool and set it outside the pool inverted so all excess water drains into the holder.
- REMEMBER TO REPLACE IT IN WATER WHEN FINISHED USING POOL!

**Replacing Cartridges**

- The Pool Frog Mineral Reservoir must be replaced every 6 months or once a pool season whichever is shorter. At that time discard Pool Frog Mineral Reservoir in trash even if, upon shaking, it appears there is spent media left inside. Once wetted the time released minerals in the cartridge are effective up to six months. Do not attempt to reuse the product once removed from the pool. {For ease in remembering to replace, mark your calendar with the reminder stickers provided with the product.}
- Replace the Pool Frog Chlorine Cartridge when empty. Drain water in cartridge to ensure it is empty then discard in trash. The cartridge life will vary depending on pool size and number of users. {Once your usage is determined, mark the calendar with enclosed reminder stickers.}

**Regular Pool Care**

- Run filtration system as recommended by your spa manufacturer.
- Regularly test water for pH, total alkalinity and {chlorine} {bromine} levels {with the precise Frog Brand Test Strips.}
- Maintain at least 0.5 ppm chlorine level at all times.
- Shock the pool once a week or as needed.
- Additional shocking may be required if pool is under heavy use. This is often the case when the pool is new.
- Remember to replace Pool Frog Mineral Reservoir and Pool Frog Chlorine Cartridge as directed under "Replacing Cartridges."

# [Operational Instructions 4 for Spa Cartridge used in Floating System]

[All text is optional]

## Floating System Operation Instructions

Congratulations! Your spa came with a complete mineral and bromine {or chlorine} {sanitation} {disinfecting} {disinfection} system. When using the patented Pool-Frog Mineral Reservoir with the proprietary Spa Frog Bromine Cartridge, you'll enjoy your spa more with less work and less bromine {or chlorine}.

### Less Work Because:

- The Frog Mineral {System} {Technology} {Formula}+ continuously works to control bacteria for four full months.
- Cartridges last longer to eliminate daily maintenance.
- Cartridges are pre-filled for no measuring or mess.
- Simply adjust to your settings and relax for weeks.

### Less Bromine {or Chlorine} Because:

- With minerals in the water, bromine {or chlorine} use is cut by up to 50%.\*
- Bromine {Chlorine} lasts longer: 2-4 weeks on a 350 gallon spa with average use.
- With minerals and low levels of bromine {or chlorine}, the water feels softer.
- The system reduces odors and leaves the water crystal clear.
- Frog Mineral System} {Technology} {Formula}+ works with bromine.

You're going to love your Frog System. If you have any questions, contact our customer service representatives at 800-222-0169.

\* Compared to the minimum ANSI recommended bromine {or chlorine} level of 2.0 ppm for a spa.

### Spa Start Up

- Always drain and refill spa at least every 4 months.
- Clean and replace filter cartridges when dirty (*Follow manufacturer's instructions*).
- Balance water according to the chart.

NOTE: Bromine {or chlorine} levels are lower only when used with Frog minerals

Water Balance Guidelines	
pH:	7.2 – {7.6} {7.8}
Total Alkalinity:	80 – 180 ppm
Calcium Hardness:	150-400
Total Dissolved Solids:	<1500
*Free Bromine {or Chlorine}:	1.0 – 2.0 ppm

- Heat water to recommended temperature before using cartridges.
- **Very Important!** Before using cartridges, establish an initial residual of 1.0-2.0 ppm bromine or chlorine with {either granular Brominating Concentrate™ (which typically contains 85% sodium dichlor (chlorine) and 15% sodium bromide) OR a chlorine shock} {a chlorine shock or sodium bromide product}. {For best results use a start-up spa shock packet that quickly dissolves with an effervescent fizzing action – one packet per 500 gallons.} {Do not use a non-chlorine shock.} Use {the appropriate bromine or chlorine test strips or kit and follow manufacturer's instructions.} {Frog Brand Test Strips to accurately maintain the reduced 1.0 to 2.0 ppm bromine level following the label directions carefully.}

Brominating Concentrate™ is a registered trademark of Bio-Lab, a Chemtura Company.

- Begin regular spa care procedures (see back page) as soon as start up is complete.

**Setting Cartridges**

- Set the blue mineral cartridge to wide open on #6 by holding the bottom and turning the top until the number 6 appears in the setting window. No further adjustments are necessary.
- With a freshly filled spa, initially set the yellow bromine cartridge on #5 for the first 24 hours **ONLY**. Then the first week or so, before each use, test the water {with Frog Brand Test Strips} and adjust cartridge by 1 setting per day until the {bromine stabilizes to at least 1.0 ppm.} {color on the test strip matches the ideal {Frog} bromine range of 1.0' to 2.0 ppm.}

**Using the Floating System**

- Insert both cartridges into the green floating holder by pushing them into the openings until they stay in place.
- Let the Floating System free-float in the spa.
- When using the spa, simply remove the Pool Frog Mineral Reservoir, drain most of the water into the spa and set on the side of the spa inverted so all excess water drains into the holder.
- REMEMBER TO REPLACE IT IN THE WATER WHEN FINISHED USING SPA!

**Replacing Cartridges**

- The Pool Frog Mineral Reservoir must be replaced every 4 months. After four months of use, or when draining and refilling the spa with fresh water, discard Pool Frog Mineral Reservoir in trash even if, upon shaking, it appears there is spent media left inside. Once wetted the time released minerals in the cartridge are effective up to four months. Do not attempt to reuse the product once removed from the spa. For ease in remembering to replace, mark your calendar with the reminder stickers provided with product.
- Replace the bromine cartridge when empty. Drain water to ensure cartridge is empty then discard in trash {or offer for recycling}. The cartridge life will vary depending on spa size and number of users. Once your usage is determined, mark the calendar with enclosed reminder stickers.

**Regular Spa Care**

- Run filtration system as recommended by your spa manufacturer.
- Regularly test water for pH, total alkalinity and bromine levels {with the precise Frog Brand Test Strips.}
- Maintain at least 1.0 ppm bromine level at all times.
- Shock the spa once a week or as needed.
- Additional shocking may be required if the spa is under heavy use. This is often the case when the spa is new.
- Remember to replace Pool Frog Mineral Reservoir and Spa Frog Bromine Cartridge as directed under "Replacing Cartridges".

# [Operational Instructions 5 for Spa Cartridge used in In-Line System] [All text is optional]

## In-Line System Operating Instructions

### Congratulations!

Your spa came with a complete mineral and bromine {or chlorine} {sanitation} {disinfecting} {disinfection} system. When using the patented Pool Frog Mineral Reservoir with the proprietary Spa Frog Bromine Cartridge, you'll enjoy your spa more with less work and less bromine {or chlorine}.

### Less Work Because:

- The Frog Mineral {System} {Technology} {Formula}+ continuously works to control bacteria for four full months.
- Cartridges last longer to eliminate daily maintenance.
- Cartridges are pre-filled for no measuring or mess.
- Simply adjust to your setting and relax for weeks.

### Less Bromine {or Chlorine} Because:

- With minerals in the water, bromine {or chlorine} use is cut by up to 50%.\*
- Bromine {Chlorine} last longer: 2-4 weeks on a 350 gallon spa with average use.
- With minerals and low levels of bromine {or chlorine}, the water feels softer.
- The system reduces odors and leaves the water crystal clear.
- Frog Mineral {System} {Technology} {Formula}+ works with bromine.

You're going to love your FROG System. If you have any questions, contact our customer service representatives at **800-222-0169**.

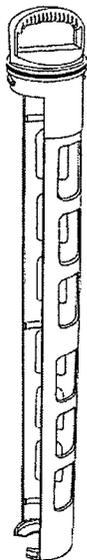

\* Compared to the minimum ANSI recommended bromine {or chlorine} level of 2.0 ppm for a spa.

### Let Us Dissect This Frog For You: The complete In-Line System

The In-Line System is made up of (A) a Frog cap that is easily distinguishable among the fittings on the top {rim} {edge} of the spa, (B) a cartridge holder that pulls out of the system, (C) a mineral cartridge that helps control bacteria in the water and (D) a bromine cartridge that helps support the minerals while oxidizing contaminants like body oils. The cartridges are adjustable to meet your specific spa water care needs.

A. Frog Cap

B. Cartridge Holder

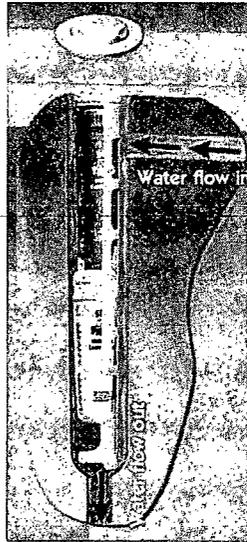

C. Mineral Cartridge

D. Bromine Cartridge

Cut-away view of cartridges snapped into holder and placed into the In-Line System.

**Start Up** - Follow all directions from your spa manufacturer on filling and balancing the water in your spa. Standard guidelines for balancing the water are as follows:

Water Balance Guidelines	
pH:	7.2-{7.6} {7.8}
Total Alkalinity:	80-180 ppm
Calcium Hardness:	150-400
Total Dissolved Solids:	<1500
*Free Bromine {or Chlorine}:	1.0-2.0 ppm

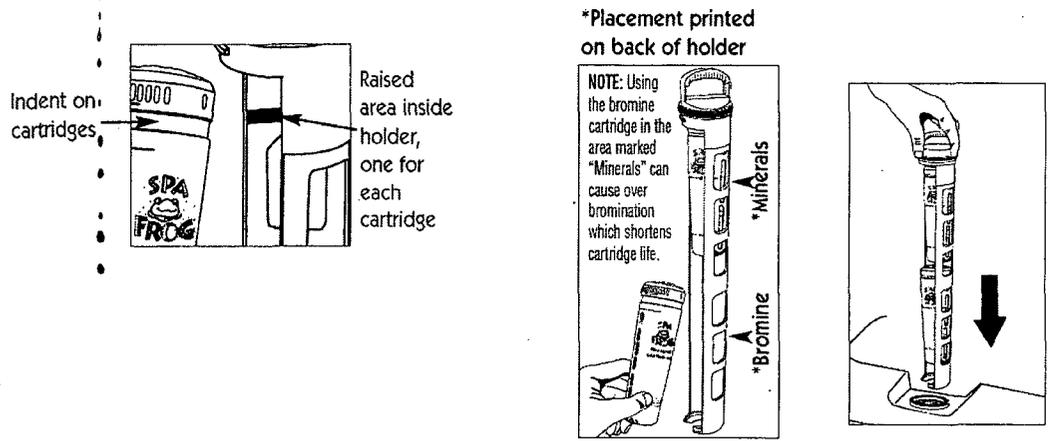

\*NOTE: Bromine {or chlorine} levels are lower only when used with Frog minerals

- Use a metal out or sequestering agent if fill water is high in metals. Wait 24 hours before continuing start up.
- **Very Important!** {Shock spa to establish a 1.0-2.0 ppm bromine {or chlorine} residual. Add directly to spa following manufacturers' directions.} Before using cartridges, establish an initial residual of 1.0-2.0 ppm bromine or chlorine with {either granular Brominating Concentrate™ (which typically contains 85% sodium dichlor (chlorine) and 15% sodium bromide) OR a chlorine shock.} {a chlorine shock or sodium bromide product.} {For best results use a start-up spa shock packet that quickly dissolves with an effervescent fizzing action – one packet per 500 gallons} {Do not use a non-chlorine shock.} Do NOT add through the In-Line System. Use {the appropriate bromine or chlorine test strips or kit and follow manufacturer's instructions.} {Frog Brand Test Strips to accurately maintain the reduced 1.0 to 2.0 ppm bromine level following the label directions carefully.}
- When spa reaches operating temperature per your spa manufacturer's directions, set the mineral and bromine cartridges according to directions on page # and insert them into the System.

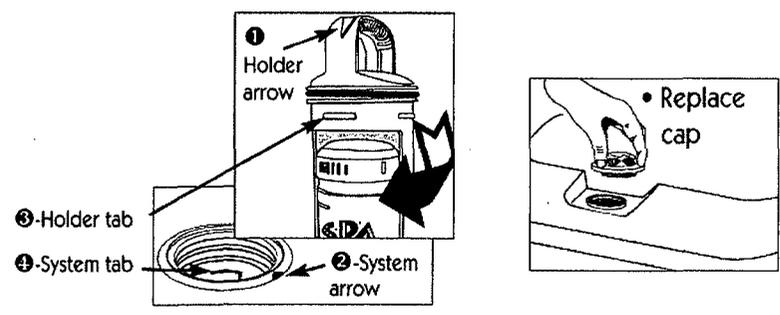

**Replacing Cartridges**

- Open cap of In-Line System and set aside. DO NOT OPEN CAP WHILE JETS ARE ON.
- Remove holder by pushing down and turning counterclockwise before pulling out.

- Remove spent cartridges by pushing bottom out through openings in back of holder. Then grab cartridge and pull out.
- Snap the Pool Frog Mineral Reservoir into the area marked "Minerals" (top portion) and the Spa Frog Bromine Cartridge into the area marked "Bromine" (bottom portion) making sure to line up the indentation at the top of the cartridges with the raised area on the holder.

- Slowly insert holder into system. Line up holder arrow-① with system arrow-②. Push down until holder tabs-③ go past system tabs-④ and turn holder to the right (clockwise) until it stops. To ensure a locked position, attempt to pull holder up. If it stays in place, the lock is secure.

- Begin regular spa care procedures (see page #) as soon as start-up is complete.

**Adjusting and When to Replace Pool Frog Mineral Reservoir:**

- Set Pool Frog Mineral Reservoir wide open on #6 by holding the bottom and turning the top until the number 6 appears in the setting window.
- The Pool Frog Mineral Reservoir must be replaced every 4 months. After four months of use, or when draining and refilling the spa with fresh water, discard Pool Frog Mineral Reservoir in trash even if, upon shaking, it appears there is spent media left inside. Once wetted the time released minerals in the cartridge are effective up to four months. Do not attempt to reuse the product once removed from the spa. For ease in remembering, mark your calendar with the Reminder Stickers included with this manual {See spa manufacturer's draining recommendations.}

**Adjusting and When to Replace Spa Frog Bromine Cartridge:**

As every spa is different, finding the right setting for the bromine cartridge will require monitoring your usage for the first week or two. ~~Begin with an initial setting based on the chart {below} {on page #}~~ and monitor bromine levels daily or before each use, adjusting the cartridge by one setting per day until a 1.0-2.0 ppm level has been achieved. {Use Frog Brand Test Strips with the ideal Frog bromine range clearly marked on the label.} To adjust cartridge, remove from system and turn to the next highest setting if the bromine level is low, or the next lower setting if the bromine level is high. The bromine cartridge needs to be replaced when empty. Drain water to ensure empty then discard in trash. On most spas, it will last between 2 and 4 weeks. Always maintain at least 1.0 ppm bromine level.

**INITIAL START-UP SETTING**

	Spa Size (Gallons)		
Daily Filter Time	250-300	300-400	400-500
One Hour	2	3	4
Two Hours	2	2	3
Four Hours	1	2	2
24 hour @ low flow	1	2	2

NOTE: The more you use the spa, for instance when you first get it, the greater the setting to achieve at least 1.0 ppm. (This may require a higher setting than what is listed in the chart.) If usage decreases or the bromine level is greater than 2.0 ppm, lower the setting.

**Regular Spa Care Procedures:**

Always follow the directions for operating your particular spa.

- Run filtration system as directed by your spa manufacturer to maintain proper water flow through the In-Line System.
- Regularly test water for pH, total alkalinity and bromine levels {with the precise Frog Brand Test Strips}. Maintain at least 1.0 ppm bromine {or chlorine} level at all times.
- Shock the spa {with granular chlorine or a non-chlorine shock} once a week or as needed. Additional shocking may be required if the spa is under heavy use. This is often the case when the spa is new.
- Remember to replace your Pool Frog Mineral Reservoir and Spa Frog Bromine Cartridges as directed under "Adjusting and When to Replace".
- Lubricate o-ring twice a year with a silicone lubricant.

**[Operational Instructions 6 for Filter Spa Product]**  
**[All text is optional]**

**Operation Manual For Use in Filter Core**

**Specifications**

- Fits in most filters.
- Handles spas up to 600 gallons.
- Lasts 4 months.
- {Easy to set reminder dial for product replacement.}
- Use with bromine or chlorine.

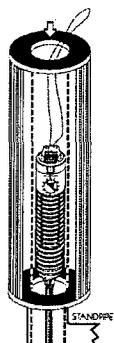

**Spa Start Up**

- Always drain and refill spa at least every 4 months.
- Clean or replace filter cartridge when dirty (*Follow manufacturer's directions*).
- Balance water according to the chart.
- Shock spa to establish a bromine or chlorine residual of 1.0-2.0 ppm with {an EPA approved spa shock} {or by other means} {a spa start-up shock packet}. (*Follow manufacturer's directions*).
- Begin Regular Spa Care procedure on back page.

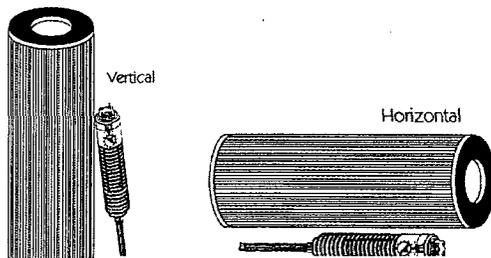

Note: Bromine {or chlorine} levels are lower only when used with the Frog Mineral {System} {Technology} {Formula}+

**Installing Pool Frog Mineral Reservoir**

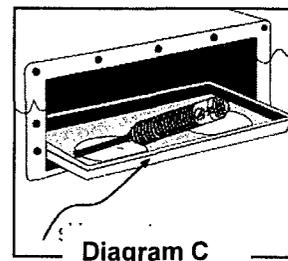

- {Set reminder dial on Pool Frog Mineral Reservoir to 4 months from month of installation. Turn dial by hand or with a coin if needed.} {Mark your calendar with enclosed reminder sticker for the 4 month replacement date.}
- Place Pool Frog Mineral Reservoir in one of the following locations in spa:
  - Majority of Spas** – Insert Pool Frog Mineral Reservoir inside filter cartridge core (**Diagram A**). Do not allow Pool Frog Mineral Reservoir to sit too low in the filter. If blocking water flow install in filter well (**Diagram B**). If Pool Frog Mineral Reservoir is inside a standpipe, attach a string to the {handle on top} {Frog head handle} for easy removal.
  - High Flow Spas** – On skimmer filters with 2.5 HP or larger pump motors, place Pool Frog Mineral Reservoir in filter well outside the filter cartridge (**Diagram B**).
  - Small Cartridge or Other Spas** – Place Pool Frog Mineral Reservoir in skimmer tray (**Diagram C**).

**Diagram A**

**Diagram B –**  
High Flow Spas in Filter Well

**Diagram C**

If unit is too tall, cut rod at hash marks to shorten.

**Regular Spa Care**

- Ensure all spa equipment is working properly.
- Run filtration system a minimum of three hours per day.
- Regularly test water for pH, total alkalinity and bromine {or chlorine} levels.
- Maintain at least a 1.0 ppm bromine {or chlorine} level at all times.
- Shock the spa once a week or as needed. Additional shocking may be required if the spa is under heavy use. This is often the case when the spa is new.
- The Pool Frog Mineral Reservoir must be replaced every 4 months. After four months of use or when draining and refilling the spa with fresh water, discard Pool Frog Mineral Reservoir in trash even if, upon shaking, it appears there is spent media left inside. Once wetted the time released minerals in the cartridge are effective up to four months. Non-refillable container. Do not reuse or refill this product. Do not attempt to reuse the product once removed from the spa.

{Set for 4 mos.}

# [Operational Instructions 7 for Floating Pool Cartridge]

[All text is optional]

## FROG Mineral System Operation Manual

This is not a toy. For sanitizing pop-up pools only! Tether to pool with enclosed cord.

{Welcome to pool care courtesy of FROG. The FROG {Mineral System+} {Mineral Sanitizing Pool Care} {pool care with sanitizing minerals} {sanitizing mineral pool care} will help destroy bacteria to keep your pool clean with less work and up to 50% less chlorine.\* It is super easy to use and will keep you enjoying a clean, clear swimming pool, for weeks at a time. Here's all you do:} {The FROG Mineral Reservoir is {part of} a complete pool care system for pop-up pools that {uses} {utilizes} the patented mineral formula of the FROG Mineral Reservoir with {low(er)} {reduced} levels of chlorine from the chlorine cartridge to destroy bacteria, help maintain pH and restore water clarity. Simply {connect,} {turn} {twist} to set and {toss into} {tether to} {plop in} the pool. Everything is prefilled and contained {{for} no mess, no guess {and} no stress {pool care.}} {The best part is it flips over when {empty} {out} {time to replace a {chlorine} cartridge.} {Hey! Less Work Hey! Less Chlorine Hey! Less Money}}

Register your FROG Mineral Reservoir at [kingtechnology.com](http://kingtechnology.com)

### Pool Start-up

1. Balance your water according to the water balance guidelines. The FROG Mineral Reservoir controls the free chlorine level only. pH is affected by weather and the make-up of your source water.

WATER BALANCE GUIDELINES	
pH	7.2-7.8
Total Alkalinity	60-120 ppm
{Calcium Hardness	150-400}
{Total Dissolved Solids	<1500}
Stabilizer (Cyanuric Acid)	20-80 ppm
Free Chlorine	0.5-1.0 ppm

2. Shock pool to remove contaminants (follow manufacturer's directions).
3. Remove {the} {outer} packaging from both the mineral and chlorine {halves} {hemispheres} {cartridges} {pacs} {pieces} {sections} of the FROG Mineral System. NOTE: Small mineral particles may have dislodged from the cartridge in shipping. Simply discard in trash. Bring the two {halves} {cartridges} together and line up the {arrows} {alignment marks} {tick marks} {icons} {water drops} {arrow on the chlorine cartridge with the unlock symbol on the mineral cartridge}. Push together and twist to lock. {Do not twist past setting #x or damage to the product could result.}

{If using the {algaecide} {clarifier} {scent} {shock} pac, attach {to} {complete system} {mineral cartridge} {between the mineral and chlorine cartridges}. Follow the instructions on that product for proper use.}

### {Setting the FROG Mineral System}

4. Twist the mineral {half} {hemisphere} {replacement} {cartridge} {pac} opposite of the chlorine {half} {hemisphere} {replacement} {cartridge} {pac} until the setting number for your pool size is lined up with the {arrow} {alignment mark} {tick mark} {icon} {water drop} {on the chlorine cartridge} (see chart below). Even at the lowest possible setting of 0 there will be some chlorine released into the pool.

- 5. {Then simply toss it into the pool or} tether it to the pool {side} {frame} or ladder {with the cord provided,} away from the skimmer or a return jet. {Use {the enclosed cord} {a string} tied to the {loop} {hole} in the product.}
- [graphic callouts:] {gray} {green} {blue} mineral cartridge, {blue} {yellow} chlorine cartridge, Setting # on mineral cartridge, Twist mineral opposite of chlorine
- 6. Test the water periodically and {adjust the setting until the chlorine level is} maintain{ed} at {least a} 0.5 ppm to 1.0 ppm {chlorine level}. Use the precise FROG {Brand} Test Strips to help measure the ideal chlorine range when used with FROG minerals. Based on average pool usage, chlorine will last {on average} {about} {up to} {4-6 weeks for pools up to {3000} {4000} gallons or} {{2} {3}-4 weeks for pools up to {5000} {6000} gallons,} {3-4 weeks} except during times of hot water temperatures and heavy pool use.

**{Pool Frog Mineral Reservoir} Initial Setting Chart {For 2000 to 5000 Gallons}**

Diameter	{Pool Gallon Size}	Setting #	Diameter	{Pool Gallon Size}	Setting #
'	{Gallons}		'	{Gallons}	
8-10'	{1000}	#	18'	{5000}	#
10'	{1500}	#	18'	{5500}	#
12'	{2000}	#	18'	{6000}	#
12'	{2500}	#	18'	{6500}	#
15'	{3000}	#	20'	{7000}	#
15'	{3500}	#	20'	{8000}	#
15'-16'	{4000}	#	21'	{9000}	#
15'-16'	{4500}	#	21'	{10,000}	#

 {Most common pool size} {For example, pools 15' in diameter or 4000 gallons would use setting x}

NOTE: {See the information that came with your pool or} calculate pool gallons by multiplying diameter x diameter x water height x 5.9 or visit our pool volume calculator at [kingtechnology.com](http://kingtechnology.com).

**Replacing the Chlorine {Brand} {Half} {Hemisphere} {Replacement} {Cartridge} {Pac} {Recharge}**

When the product is almost empty it will {begin to} slowly {flip} {roll} over giving you {a day or two} notice that it's about time to replace. If it stays on its side longer than a day or two, pull unit out of the water and let it drain. Reset it in the water to see if it flips completely. {If it does} {When it completely {flips} {rolls} over} replace by {rotating the two {halves} {hemispheres} {cartridges} {pacs} {pieces} {sections} until the {arrows} {alignment marks} {tick marks} {icons} {water drops} align along the edge of both {halves} {cartridges} and pull apart} {arrow on the chlorine cartridge aligns with the unlock symbol on the mineral cartridge and pull apart}. Follow the start-up procedures {above for attaching a filled chlorine {brand} {half} {hemisphere} {replacement} {cartridge} {pac} {recharge}}.

Do not remove the chlorine cartridge until the system has completely flipped. If the chlorine {half} {hemisphere} {replacement} {cartridge} {pac} {recharge} {still} contains a small amount of chlorine after the system has {flipped} {rolled} over, place in pool by itself {until completely empty}. Do not allow chlorine cartridge to sink to the bottom or pool bleaching may occur. When completely empty, discard in trash {or offer for recycling}.

**Regular Pool Care**

1. Run pump and filter at least 8 hours per day but ideally 24 hours. Clean or replace your filter cartridges weekly. Lack of circulation may cause bleaching of pool surface and improper sanitization levels.
2. Skim the surface of any debris and remove anything collected on the return fitting to your pump.
3. Regularly test water for pH, total alkalinity and chlorine levels. Adjust your pH when it rains or when adding fresh water to the pool.  
Maintain at least 0.5 to 1.0 ppm chlorine level at all times.
4. Replace {the} chlorine {cartridge} when {the FROG Mineral System completely} {flips} {flipped} {rolls} over.

5. Shock the pool {weekly in the heat of the season and} {at least weekly when the pool is being used and every few days whtn the water temperature is 90 degrees or more} {as needed} to maintain water clarity. Follow label directions on the shock treatment used.
6. Replace the complete Frog Mineral {Reservoir} {System} every 6 months or after one pool season whichever is shorter. If the pool is drained and refilled prior to six months {or one pool season}, Pool Frog Mineral Reservoir must be replaced at that time.

NOTE: This product may be removed from the pool when in use {or if the pool has over chlorinated.} Lift out of the water and let drain into the pool. Then hang over the outside of the pool {on {the cord provided} {a string}} or place on the ground or surface that is not susceptible to bleaching from the chlorine. Remember to replace the product once exiting the pool {or when the chlorine levels return to normal.}

# [Operational Instructions 8 for Cartridge for Bulk Chlorinator]

[All text is optional]

## FROG Mineral System Operation Manual

Welcome to pool care courtesy of FROG. The FROG Mineral System+ will destroy bacteria to keep your pool clean with less work and up to 50% less chlorine.\* It is super easy to use because it fits inside your current {Hayward®} {Rainbow®} {or equivalent} chlorinator. You simply enjoy a clean, clear swimming pool without touching or counting chlorine {tablets} {pucks} again. Here's all you do:

### Swimming Pool Tips

1. Make sure the pool has adequate circulation. The pool water must completely circulate through the pump and filter at least 1 to 2 times per day. This usually requires 8 to 12 hours. Check with your dealer for the proper circulation time for your pool.
2. Before beginning with any pool care program, you must first balance your pool water. Take a water sample to your local pool professional {or use a complete test kit} that will test for the following important elements.

Water Balance Guidelines	
pH:	7.2-7.8
Total Alkalinity:	60-120 ppm
Calcium Hardness:	150-400
Total Dissolved Solids:	<1500
Stabilizer:	20-80 ppm
Free Chlorine:	0.5-1.0 ppm

3. If your fill water is high in metals, use a sequestering agent or metal out product at start up only before using the mineral reservoir. See your local dealer for details on using these products and always follow manufacturer's directions carefully.
4. After your pool is up and running smoothly, continue to test your water for pH, total alkalinity and chlorine {with FROG Brand Test Strips} and maintain its balance by adding any necessary adjustment products (see you dealer for details).
5. Check the pool's filter gauge often and periodically clean filter per the manufacturer's directions. A dirty filter will slow the flow of water which could hamper proper circulation.

### {How to replace the Pool Frog components}

#### {Replacing} {Using} a Pool Frog Mineral Reservoir and Chlorine Pac

1. Check the {top} {front} of the box {and {back} label of product} to make sure you have the correct Pool Frog Mineral Reservoir to fit your {Hayward®} {Rainbow®} chlorinator.

THE POOL FROG MINERAL RESERVOIR MUST BE REPLACED EVERY 6 MONTHS OR AFTER ONE POOL SEASON WHICHEVER IS SHORTER.

2. Remove the material covering the holes on the bottom {and side} of {remove the plug from the side of} the Chlorine Pac.

3. {If using Algaecide Pac. {push} {screw} {affix} {insert} algaecide {pac} {container} {bottle} {on} {in} to the {chlorinator} {adapter that attaches to the} {Pool Frog Mineral Reservoir} {while inside the chlorinator} {then insert into chlorinator}. Replace cap, turn dial full open and run for 90 minutes. Remove algaecide {pac} {container} {bottle} and discard or recycle.}
4. Connect the Pool Frog Mineral Reservoir to the Chlorine Pac by bringing the two together, lining up the arrows and turning the chlorine pac clockwise to lock.
5. Turn off pump, turn chlorinator dial closed or off and open the cap.
6. {Lift up} {Use} the handle {and} {to} lower the complete system into the {Hayward®} {Rainbow®} chlorinator by lining up the square channel on the side of the Pool Frog Mineral Reservoir and Chlorine Pac with the dial side of the {Hayward®} {Rainbow®} chlorinator.
7. Replace the chlorinator cap. If the system is not seated properly the cap will not close. Pull up, check alignment and re-lower into chlorinator.

Channel in Pool Frog Mineral Reservoir  
 Dial side of {Hayward®} {Rainbow®} chlorinator

**Replacing the Chlorine Pac**

Chlorine Pacs will help ensure a reduction of up to 50%\* in chlorine use. *Pacs sold separately.* (EPA Reg. No. 53735-2)

*\*Compared to the minimum EPA recommended chlorine level of 1.0 ppm for a stabilized swimming pool.*

Avoid sparks, open flame or smoking when handling the pac.

1. When the chlorine pac is empty remove the entire {system} {product} from the chlorinator. Turn the chlorine pac counter clockwise to unlock it from the Pool Frog Mineral Reservoir. Simply connect a new Chlorine Pac by lining up the arrows and turning the chlorine pac clockwise until it locks.  
     Alignment arrows  
     Turn clockwise
2. {Lift up} {Use} the handle {and} {or} lower the complete system into the {Hayward®} {Rainbow®} chlorinator by lining up the square channel on the side of the Pool Frog Mineral Reservoir and Chlorine Pac with the dial side of the {Hayward®} {Rainbow®} chlorinator.

The chlorine pacs are made of HDPE plastic. Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. Rinse thoroughly before recycling or discarding in trash.

Mark your calendar for the six month replacement of the Pool Frog Mineral Reservoir and approximate replacement times for the Chlorine Pacs. Once wetted, the time released mineral coating of this product is effective up to 6 consecutive months or one pool season whichever is shorter. After that time, even if you hear the spent media inside, it is no longer effective and must be replaced.

**Start-up and Operation**

1. Add a stabilizer or conditioner to the pool at the beginning of the season if the stabilizer level is below 20 ppm. This will prevent chlorine burn off. Follow manufacturer's directions carefully.

- 2. {Shock the pool with {an EPA registered chlorine shock} {a shock pac} to rid the water of all contaminants before beginning. Follow manufacturer's directions carefully.}

Do not add shock in or near the skimmer or into the chlorinator as it could damage equipment, risk potential explosion or discolor your pool surface.

**THIS STEP IS VERY IMPORTANT TO START-UP: USE CHLORINE SHOCK ONLY.**

- 3. {If using the Algaecide {pac} {container} {bottle}, follow the directions for use on that product now.}
- 4. Install Pool Frog Mineral Reservoir and Chlorine Pac into the {Hayward®} {Rainbow®} chlorinator. See page 1 for directions.

REPLACE THE POOL FROG MINERAL RESERVOIR EVERY 6 MONTHS OR AFTER ONE POOL SEASON WHICHEVER IS SHORTER.

- 5. **SETTING CONTROL DIAL** Set control dial by matching up the parameters of your pool on the charts below. THIS IS A STARTING POINT ONLY and may need to be adjusted to fit your individual pool needs. See # {x} for directions.

Initial Setting Chart	
Pool Gallon Size	Setting #
10,000	#
15,000	#
20,000	#
25,000	#
30,000	#
35,000	#
40,000	#

- 6. For the first week test the pool water daily for free chlorine {with Frog Brand Test Strips} to ensure correct dial setting. Continue to test weekly throughout the season. After testing, adjust the dial up by ½ increment if the free chlorine reading has dropped below 0.5 ppm or down by ½ increment if the reading has risen above 1.0 ppm. Continue this process each day until the {reading stabilizes to at least 0.5 ppm.} {color on the test strip matches the ideal Frog range of 0.5 ppm to 1.0 ppm free available chlorine (FAC).} Remember to adjust dial by ½ increments only, in order to prevent over chlorination which may bleach pool surfaces.
- 7. Shock pool every two weeks or as needed to maintain water quality. Follow label directions on the chlorine shock treatment used.

Rainbow® is a registered trademark of Pentair Inc.

**[Copy for packaging and labeling - All text on this page is optional]**

{Frog Mineral {System} {Technology} {Formula}+ improves {swimming pool pleasure} {your swimming experience} by reducing the problems associated with chlorine. {Experience the FROG difference} {It gives you):

- Less work with no daily dosing {of minerals or chlorine}.
- Sparkling water for above ground and in ground pools.
- Pre-filled pacs eliminate fumes typical of chlorine buckets.
- Reduces Fading Swimsuits
- Lower chlorine levels help prevent damage to equipment and surfaces.
- A neutral pH with less monitoring

Let Us Dissect This Frog For You

A Mineral {Sanitizing} {Disinfecting} System With 3-Parts

- Frog Cyclor holds the Mineral Reservoir and chlorine Bac Pac
- Pool Frog Mineral Reservoir contains the minerals
- Frog chlorine Bac Pac (sold separately EPA Reg. No. 53735-2) provides low chlorine support.

Here's How It Works

- The Frog System destroys bacteria
- The Frog Mineral System reduces chlorine use up to 50% compared to the minimum EPA recommended chlorine level of 1.0 ppm for a stabilized swimming pool.
- When using the chlorine Bac Pac water flows through minerals and chlorine so one unit does all.

Frog is more fun

Up To 50%\* Chlorine Reduction with Pool Frog Mineral System

Take home the complete mineral system including:

FROG's Complete Pool Care System includes:

1. Pool Frog Mineral Reservoir
  - Fits inside the Frog Cyclor
  - Contains minerals that help to {control} {destroy} bacteria
  - Replace mineral reservoir every season – do not use more than 6 consecutive months.
2. Chlorine Bac Pac (sold separately – EPA Reg. No. 53735-2)
  - Pre-filled with Trichlor (chlorine) tablets.
  - Sits inside the Pool Frog Mineral Reservoir for a complete system
  - Set the Cyclor dial for achieving at least 0.5 ppm chlorine level (see instruction manual)
  - Replace chlorine Bac Pac when empty
3. Frog BAM Algae Preventative (sold separately – EPA Reg. No. 53735-9)
  - Algae Protection Guarantee when used with the Complete Frog System
  - Dispenses in 90 minutes and provides 90 days of algae protection}

Don't forget Frog Wake-Up Kit for spring openings and Frog Hibernation Kit for pool closings.

There's a Frog For You!

**[All text on this page is optional]**

Frog Copy by Category:

1. Less Work

- Less work with a 6 month Mineral Reservoir and pre-filled chlorine Bac Pac.
- Less work with pre-filled disposable cartridges.
- No more daily maintenance with replacement products that last weeks or months at a time.
- Take back the fun of your pool by reducing the work and increasing the pool's life.
- {Frog offers} more fun {with your family}! Let Frog do the work for you.
- Relaxation and peace of mind.
- Set the Cyclor valve and it dispenses minerals and chlorine automatically.
- Automatic dispensing of minerals and {chlorine} {bromine} – Automatic pool care.

2. Less {Chlorine} {Bromine}

- Frog is a mineral system with a pre-filled chlorine pac that meets the EPA requirements to lower previously approved safe chlorine levels by up to 50%.\* (\*1.0 ppm was EPA's previously approved safe level for a stabilized swimming pool).{for pools}
- Pool Frog Mineral Reservoir is a mineral system using a pre-filled bromine cartridge that meets the EPA requirements to lower previously approved safe bromine levels by up to 50%.\* {for spas}
- With standard chlorine products for swimming pools, EPA has NOT approved a chlorine level of 0.5 ppm without using minerals.
- With standard bromine {or chlorine} products for spas and hot tubs, EPA has NOT approved a bromine {or chlorine} level of 1.0 ppm without using minerals.
- The Frog Mineral {System} {Technology} {Formula}+ destroys bacteria so less {chlorine} {bromine} is needed for complete {pool} {spa} care.
- Minerals help destroy bacteria so less {bromine} {or chlorine} is needed for complete spa care.
- Lowers {chlorine} {bromine} {usage} {use}
- Reduces {chlorine} {bromine} consumption
- Frog Mineral {System} {Technology} {Formula}+ reduces the formation of chloramines and odors.
- Frog Mineral {System} {Technology} {Formula}+ reduces chloramines and its effects.

3. Water Quality

- Pool Frog's minerals make a difference you can see and feel.
- Water feels softer with a crystal clear shine.
- For softer water with a crystal clear shine.
- Frog minerals condition the water for extra softness.
- Frog Mineral {System} {Technology} {Formula}+ reduces the problems associated with {chlorine} {bromine} like {faded} {fading} swimsuits.
- Lower chlorine levels help prevent damage to equipment and surfaces.
- Spend the day in the {pool} {spa} without worrying about faded swimsuits.
- Pool Frog gives you a reliable way to have fresh, clean, clear water in your family's {pool} {spa}.
- With Pool Frog Mineral Reservoir your spa will have the feel of a hot spring in the Rocky Mountains cascading over your tired limbs and soothing muscles.
- Pool Frog Mineral Reservoir transforms your spa into the perfect environment for soothing relaxation.
- The perfect spa environment.
- Makes water brilliantly clear {and soft}

40/72

**[All text on this page is optional]**

- Restores water clarity
- Frog Mineral {System} {Technology} {Formula}+ conditions water for extra softness
- The Pool Frog Mineral {system} {formula} destroys bacteria and is easy on swim suits, and skin.
- Effectively {fights} {destroys} bacteria
- Prevents the things you don't like about chlorine like bleached swim suits

**4. How Frog Mineral {System} {Technology} {Formula}+ Works**

- Frog Mineral {System} {Technology} {Formula}+ helps rid the water of harmful bacteria.
- Frog's patented mineral {System} {Technology} {Formula}+ destroys bacteria with a controlled release formula that lasts {6} {4} months.
- Frog minerals also help keep your pH balanced by acting as a neutralizer.
- Complete mineral pool care works in all pools.
- Complete mineral spa care works in all spas\*. (\*Any spa can take advantage of a complete system including the Pool Frog Mineral Reservoir used with the Spa Frog Bromine Cartridge.)
- Improves water quality by:
  - Helping to maintain a neutral pH for softer water.
- Let Frog Mineral {System} {Technology} {Formula}+ handle the bulk of your water {sanitation} {disinfection} {disinfecting} needs.
- Silver plus 0.5 ppm chlorine is as effective as 1.0 ppm chlorine alone. {for pools}
- Silver plus 1.0 ppm bromine {or chlorine} is as effective as 2.0 ppm of bromine {or chlorine} alone. {for spas}
- Pool Frog Mineral Reservoir works together with very low levels of {bromine} {or chlorine} to control bacteria, condition the water and help neutralize pH.
- The Frog Mineral {System} {Technology} {Formula}+ provides silver to help destroy bacteria and carbonate to help keep the pH in an acceptable range without monitoring.
- The Frog Mineral {System} {Technology} {Formula}+ contains silver to help destroy bacteria and carbonate to help keep the pH in an acceptable range without monitoring.
- Silver helps destroys bacteria to reduce chlorine use up to 50%\*
- Frog minerals constantly work to keep bacteria away.
- Pool Frog's mineral formula {kills} {destroys} {is sure tough on} waterborne bacteria.

**5. How To Use**

- Just set it and forget it for weeks at a time.
- Maintain at least 0.5 ppm of chlorine.
- Mark your calendar with enclosed reminder stickers for the 6 month replacement date.
- Replace the Mineral Reservoir every six months or once a season.
- Replace the chlorine Bac Pac when empty – usually every 1-3 weeks.
- Replace the 7 pound chlorine Pac for Pool Frog XL Pro when empty – usually every 3-4 weeks.

{Frog Mineral {System} {Technology} {Formula}+ improves {swimming pool pleasure} {your swimming experience} by reducing the problems associated with chlorine. Experience the FROG Difference:

- Less work with no daily dosing of minerals or chlorine.
- Sparkling water for in ground pools.
- Reduces Fading Swimsuits
- Lower chlorine levels help prevent damage to equipment and surfaces.}

{Set reminder dial to the six month replacement date.}

{Drops in Skimmer!}

{Don't close your eyes to the perfect pool.}

{The Perfect Pool Begins With Pool Frog Mineral Reservoir}

- {Lasts a full six months with a handy reminder dial
- Shroud prevents clogging and acts as a handle
- Water flows in the snorkel and openings on top and sides
- Water flows out the bottom dispensing low levels of minerals into the pool}

**[Additional Copy for Pool Cartridge used in Floating System packaging and labeling]**

- FROG Splash – The Perfect Choice for Splasher Pools
- Splash Into Summer With Pool Care From FROG
- Small pools still need proper care – make it a snap with FROG Splash
- Make sure your pool is properly treated – use FROG Splash
- Before you Splash, use FROG Splash!
- FROG Splash makes pool care a snap with 3 Easy steps:
  1. Set the cartridges according to the instructions for each
  2. Snap them into the floating holder and place in water
  3. Replace cartridges when directed (see instructions inside)
- Before your family goes for a splash – make sure the water is treated with FROG Splash.
- All pools require a method for controlling bacteria growth – even small above ground pools!
- Frog Splash contains minerals that help destroy bacteria and reduce chlorine use up to 50%.
- For use in the Frog Splash System
- Especially important for little people in little pools that create a big breeding place for bacteria.
- EPA registered and patented minerals help inhibit bacterial growth when used in conjunction with reduced levels of chlorine.
- FROG Splash allows your family to splash with a smile.
- Free floats in the pool.
- Set upside down outside the pool while in use. Remember to replace when finished using the pool.

Reduces Odors

Setting Window

Cartridge Kit for Automatic Spa Care

Contains: 1 Mineral Cartridge - Lasts 4 Months

3 Bromine Cartridges – Each Lasts 2-4 Weeks

200 grams each – Lasts 3-5 weeks

Just follow the easy guidelines below:

1. Fill spa with fresh water and bring spa to recommended temperature.
2. Balance the water's pH and total alkalinity and shock the spa to establish a bromine or chlorine residual of 1.0-2.0 ppm {using the spa start-up shock packet}.
3. Adjust your cartridges:
  - a. For the blue mineral cartridge – set wide open on Setting #6.
  - b. For the yellow bromine cartridge – set the cartridge to #5 for the first 24 hours ONLY. Then adjust down to maintain a low 1.0-2.0 ppm of bromine. That's up to 50%\* less bromine than standard spas require.
4. Insert cartridges into floating holder openings.
5. Let the Floating System free-float in your spa. When using the spa, simply lift up the Floating System, drain most of the water and set on the side of the spa inverted so all excess water drains into the holder. Return to spa when finished using.
6. Replace your cartridges:
  - a. For the yellow bromine cartridge – replace when empty. The cartridge life will vary. Once your usage is determined, mark the calendar with enclosed replacement reminder stickers.
  - b. For the blue mineral cartridge – replace every 4 months or when draining and refilling the spa with fresh water.
7. Shock the spa with a non-chlorine or chlorine shock once a week or more often if the spa is heavily used.

Replace Bromine Cartridge every 2-4 weeks. Bromine usage varies depending on spa size and number of spa users.

Mineral Cartridge must be replaced every 4 months. NOTE: You may still feel the "spent" minerals inside, but they are no longer effective and need to be replaced. Simply discard in trash.

See inside label for directions for use and disposal instructions.

Just follow the easy guidelines in the enclosed manual and the following helpful tips:

**VERY IMPORTANT!** Before using cartridges, establish a bromine or chlorine residual of 1.0-2.0 ppm {with granular Brominating Concentrate™ or a chlorine shock} {spa start-up shock packet}. (See instruction manual.)

Brominating Concentrate™ is a registered trademark of Bio-Lab, a Chemtura Company.

Cartridges are easy to snap in and out when replacing.

If desired, invert and set on side of spa when spa is in use.

Mark you calendar with enclosed replacement reminder stickers.

Experience the shape of Frog water testing with free Frog Brand Test Strips inside.

Now its easier to maintain the low 1.0 ppm bromine level with Frog Brand Test Strips. See inside for details.

Start-up is easier with the spa start-up shock packet with its {effervescent} {fizzing} action that shows it's working. See inside for details. Start up your freshly filled spa with a free Frog Jump Start.

Free spa start-up shock packet inside! Free Frog Jump Start inside \$x.xx Value

[The following Satisfaction Guarantee may or may not appear on packaging – All text is optional]

**Unconditional Satisfaction Guarantee**

You'll LOVE the SPA FROG Floating System or your money back!

If after 90 days you don't experience...

- 50%\* less bromine use
  - Less work - more fun!
  - Soft water with a crystal clear shine
- we'll replace it or refund your money. And that's a fact!

This is a limited warranty. See back for details.

Within 90 days of purchasing the SPA FROG Floating System, if you are not completely satisfied, we will refund your money or replace the SPA FROG Floating System only. To submit your claim, the following must be sent to King Technology:

- 1) The SPA FROG Floating System holder (green piece with FROG logo).
- 2) The receipt(s) showing the purchase of the SPA FROG Floating System and at least 3 SPA FROG Bromine Cartridges.
- 3) A water test analysis showing the water was balanced and the bromine level was between 1.0 and 2.0 ppm.
- 4) A written statement explaining your dissatisfaction and your request for either replacement or refund.
- 5) Return all of the above to:

King Technology Inc. c/o SPA FROG Satisfaction Guarantee  
530 11th Ave S, Hopkins, MN 55343

Please allow 4-6 weeks for processing your request.

If you have any questions, please contact Customer Service at 800-222-0169.

King Technology, Inc. warrants its SPA FROG FLOATING SYSTEM product for a period of 90 days from date of purchase. A replacement or refund will be issued if not completely satisfied with the product and the return terms and conditions are met.

**Consumer Claims Terms and Conditions**

If purchaser is not satisfied with the SPA FROG FLOATING SYSTEM for any reason during the 90-day warranty period a replacement or refund will be issued when (a) sales receipt is returned showing purchase of the SPA FROG Floating System and at least 3 SPA FROG BROMINE CARTRIDGES (b) the floating system holder is returned (c) a water test analysis shows the water was balanced and the bromine level was between 1.0 and 2.0 ppm (d) a written statement explains the dissatisfaction.

This warranty is the exclusive warranty for the SPA FROG FLOATING SYSTEM. This warranty is not transferable. KING TECHNOLOGY, INC. MAKES NO REPRESENTATION OR WARRANTY OF ANY KIND, EXPRESSED OR IMPLIED, AS TO MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER MATTER WITH RESPECT TO THE SPA FROG FLOATING SYSTEM. All claims for the SPA FROG FLOATING SYSTEM, whether in contract, negligence, strict liability or any other tort or otherwise are deemed waived or released unless submitted within the 90 day warranty period for the SPA FROG FLOATING SYSTEM with the proofs of claim required. YOUR EXCLUSIVE CLAIM SHALL IN NO EVENT EXCEED THE REFUND OF THE ORIGINAL PURCHASE PRICE OF THE SPA FROG FLOATING SYSTEM ONLY. IN NO EVENT WILL KING TECHNOLOGY, INC. BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL, SPECIAL OR PUNITIVE DAMAGES RESULTING FROM ANY CAUSE. King Technology, Inc. will not be liable for any product misuse, incorrect water balancing, allowing the bromine residual to drop below standards

How To Use: {Simple Instructions for spa cartridge used in Floating System}

- Simply snap out and snap in the pre-filled mineral cartridge.
- Set reminder dial to the four month replacement date.
- For the blue Pool Frog Mineral Reservoir – set wide open on setting #6.
- Insert cartridge into floating holder openings.
- Easy top loading access makes it a snap to replace the mineral cartridge in the holder.
- No assembly required.
- By dropping it inside your filter cartridge, filter well or skimmer, Pool Frog Mineral Reservoir works with no electricity and no hassles for four full months.
- Set it and forget it for up to 4 months.

- Mineral System{s}
- Mineral Hybrid System{s}
- Mineral Water Care System{s}
- Mineral Hybrid Water Care System{s}

Frog simple  
 Great water care made Frog simple  
 Less {chlorine} {bromine} through minerals  
 Frog it and leave it  
 Frog... in control  
 Frog... cruise control for your {pool} {spa}

Make your chlorine {bromine} last twice {2X} {two times} as long as {longer than} traditional {normal} {standard} pools {spas} with Frog minerals and only 0.5 ppm {1.0 ppm} chlorine {bromine} levels.

Maintaining 0.5 ppm {1.0 ppm}, chlorine {bromine} lasts twice {2X} {two times} as long {longer} with Frog over traditional {normal} {standard} pool {spa} care methods.

Maintaining 0.5 ppm {1.0 ppm} rather than the standard 1.0 ppm {2.0 ppm}, chlorine {bromine} lasts twice {2X} {two times} as long {longer} with FROG.

Compared to the traditional {normal} {standard} {minimum recommended} chlorine level for pools, FROG minerals make chlorine last twice {2X} {two times} as long {longer}.

Frog Minerals double the life of your chlorine {bromine} over pools {spas} on chlorine {bromine} alone.

With Frog Mineral Systems, chlorine {bromine} lasts twice {2X} {two times} as long {longer} than pools {spas} on chlorine {bromine} alone.

With Frog Mineral Systems you can go twice {2X} {two times} as long {longer} between chlorine {bromine} changes compared to pools {spas } on chlorine {bromine} alone.

With Frog in, you can get twice {2X} {two times} the life out of your chlorine {bromine} than {traditional} {normal} {standard} pools {spas} at higher chlorine {bromine} levels.

Frog uses only half the chlorine {bromine} of {traditional} {normal} {standard} pool {spa} care methods.

The Frog Mineral System allows your chlorine {bromine} {chlorine or bromine} to last {twice} {2X} {two times} {as long} {longer} as {traditional} {normal} {standard} {minimum recommended} levels.

The Frog Mineral System allows one-half the chlorine {bromine} {chlorine or bromine} to be used compared to {industry standards} {{traditional} {normal} {standard} pool care methods}.

54/72

**[All text on this page is optional]**

Put Frog in, take half the chlorine {bromine} out that {traditional} {normal} {standard} pools {spas} maintain.

With Frog minerals cutting chlorine {bromine} use by 50%, that means your chlorine {bromine} lasts twice {2X} {two times} as long {longer}!

The Frog Mineral Hybrid System uses minerals to extend the life of your chlorine - up to twice {2X} {two times} as long {longer} than pools on chlorine alone.

The 2 in 1 {two in one} water care system that helps chlorine {bromine} last twice {2X} {two times} as long {longer}.

Frog provides the 1-2\*{one-two} punch: {minerals and 50% less chlorine} {with chlorine that lasts twice {2X} {two times} as long {longer}}.

Minerals and 0.5 ppm chlorine {destroys} {kills} bacteria allowing you to use up to 50% less chlorine.

Minerals and 1.0 ppm bromine {destroys} {kills} bacteria allowing you to use up to 50% less bromine.

Using minerals and up to 50% less chlorine {bromine} means {savings to you} {less work and more savings}.

Minerals and 0.5 ppm chlorine {1.0 ppm bromine} is all you need. Otherwise you use twice {2X} {two times} of what you don't want - chlorine {bromine}!

With Frog Mineral Systems, chlorine lasts twice {2X} {two times} as long as {longer than} the industry standards {{traditional} {normal} {standard} {minimum recommended} {higher} levels.} {the standard 1.0-3.0 ppm chlorine level.} {{traditional} {normal} {standard} pools.}

With Frog Mineral Systems, bromine lasts twice {2X} {two times} as long as {longer than} the industry standards {{traditional} {normal} {standard} {minimum recommended} {higher} levels.} {the standard 2.0-4.0 ppm bromine level.} {{traditional} {normal} {standard} spas.}

To help chlorine last 2X longer use this Pool Frog Mineral Reservoir with the Pool Frog Bac Pac.

Don't forget FROG Leap Pool Wake Up! for spring openings and FROG Leap Pool Hibernation for fall closings!

Use Frog Leap Pool Wake Up! for optimal performance of your {FROG Leap } {Pool FROG System}'

Use Frog Leap Pool Hibernation {for a 1-2 Winterizing Punch} {to prepare for a smother spring start-up}

When empty, twist off chlorine cartridge (and recycle). Attach replacement cartridge.  
Attach new {blue} {yellow} chlorine cartridge to {gray} {green} {blue} mineral cartridge and set back in pool.

Low Chlorine vs. Too Much Chlorine  
Chlorine is by far the leading disinfectant used to kill bacteria in swimming pools because it works. But it needs to be controlled as chlorine in too high a dose can be a problem.

Keeping the right amount of chlorine in the pool promotes comfort and enjoyment.  
The Pool Frog Mineral Reservoir's patented design manages chlorine levels in two ways.  
First, it combines low-levels of chlorine with another anti-bacteria agent – {silver ion} minerals. Together, they destroy bacteria.

Secondly, the patented interior design of the System controls the flow of chlorine to eliminate the too-high, too-low situations.  
The result is consistent sanitation with up to half the chlorine.

{Click} {Twist} on {to replace}, {click} {twist} off {chlorine} {cartridge} {when empty}

{Frog} {Minerals} {This} {Mineral Water} Makes Chlorine... *Better?*

Chlorine is great because, well... it works! But, sometimes there really can be too much of a good thing. Too much chlorine can be **harsh**, **fade** swimming suits and **damage** pool equipment. So we came up with a clever (and fun) alternative – *Flippin' FROG!*

We all know chlorine does the job of keeping water clean but it's not always fun to swim in. It fades suits and pool surfaces. It smells to high heaven at times and it certainly doesn't leave your skin feeling soft. That's why we invented FROG fresh mineral water.

Flippin' FROG {uses minerals in addition to} and/or {creates mineral water along with} a small dose of chlorine to kill off unwanted bacteria. So, you get the benefits of chlorine, without all the negative {effects} {drawbacks}! Oh, and the minerals leave your water (and your skin) feeling soft and silky.

**[All text on this page is optional]**

And no more yo-yo pH because too much chlorine can drive your pH down. A low level of chlorine {will have less effect} {keeps the pH more stable}.

You probably know that chlorine is used to keep your pool clean, but {use} {put} too much {in} and it can fade bathing suits, damage pool equipment, leave a harsh smell and ruin your summer! That's why we {put minerals in} {create mineral water with} Pool Frog Mineral Reservoir. {Minerals} {Mineral water} allow{s} us to use a much smaller amount of chlorine and still kill the unwanted bacteria. You'll love the way Pool Frog Mineral Reservoir keeps your water silky soft and crystal clear all summer!

Without the {right treatment} {proper amount of the right stuff}, all pools {and spas} are subject to nasty bacteria growth that causes murky water and harsh smells. But, Pool Frog Mineral Reservoir's {one-two {combo} {punch} of minerals and low levels of chlorine} {mineral water with far less chlorine} deliver a knockout blow that destroys bacteria in its tracks.

On the other hand, if you treat your pool with too much chlorine, it won't be long before the kids are complaining that the water doesn't feel good and it stinks! And to add insult to injury, uncontrollable variables like outdoor temperature, swim usage, the length of the season, and rainy weather mean varying pH levels that need constant balancing.

But, we're guessing you didn't buy an {above ground} {pool} {spa} to become an expert in pool chemistry. You just want clean, clear water without all the fuss. We intimately know this because we're pool owners, too! That's why we invented Pool Frog Mineral Reservoir {Frog} {fresh} {mineral water}.

A fresh approach to keeping pool water cleaner made easy

Go ahead - get fresh with us.  
Get fresh in the pool.  
Get fresh with Frog

Pool boys have been really getting fresh lately.  
Refresh yourself.  
Get refreshed

Good clean fun - with a splash.  
Why have a chlorine pool when you can swim in fresh mineral water.  
Get fresh in your pool with fresh mineral water

Refreshingly {easy} {clean} {clear} {comfortable} {enjoyable}  
Nice {pool} {spa}! Can we freshen that up for you?  
Buying the pool was easy. Shouldn't taking care of the pool water be just as easy?

"Don't you hate it when you're all ready to have some fun in your pool – it's a beautiful sunny day, and the kids are all set to jump in – only to find that bacteria and algae have taken over, leaving the pool green, cloudy and too dirty to swim in. Talk about a kill joy."

We have two words to share with you – Flip Plop - the "almost too easy" way to keep your water crystal clear all summer long – from *Hey! Cool Pool*. How easy is it you ask? Well, you simply plop it in the pool and it goes to work on nasty bacteria and other things that make water cloudy, murky or worse. When it flips over it's time to replace the bottom cartridge. Then plop it back in.

Where most pool floaters use 100% chlorine, Flip Plop uses minerals, leaving you with fresh mineral water that feels softer without fading swimsuits, damaging pool surfaces or creating smelly odors. Having a mineral water pool means you're not swimming in a {chlorine} {chemical} bath like most pools. Mineral water also maintains its balance better meaning less work and greater comfort for swimmers.

This EPA registered product for water care, without all that chlorine, has been sold in larger pools for over 15 years. Now, pools as small as {1000} {2000} gallons can experience the mineral water difference.

Here's how it works. There are two cartridges. The top {blue} {green} cartridge provides mineral water all summer long. The yellow cartridge will deplete every 3-4 weeks. Simply connect the two cartridges by lining up the arrow with the unlock symbol. Then you twist to the setting that's right for your pool. There's a helpful chart in the manual with a setting for every pool size. Then plop it in the pool.

You'll know when to replace the bottom cartridge when the product flips over and the {yellow} {blue} side is up. Simply twist the top back to the unlock symbol and pull apart. Recycle the empty cartridge and lock in a new one. At the end of the summer, if the bottom cartridge still contains some ingredient, wrap in a plastic bag and store in a cool dry place for the winter. Discard the top cartridge as it is spent once removed from water (or after six months whichever comes first). Start fresh with a new system next summer.

With thousands of pool owners enjoying the benefits of fresh mineral water, we want to encourage you to take the {Flip Plop} {Flippin' FROG} challenge. Try it in your pool for 30 days and see if you don't experience softer, clearer water with less work! Then you too will be a believer in mineral water!

Fresh-Water Fun!  
Keeps water looking and feeling fresh!  
{Using} {Uses} minerals to keep water looking {sparkling clean} and feeling fresh  
If you just bought a{n} {above ground} pool, you NEED {this} {Pool Frog Mineral Reservoir} to make it work properly.

Chlorine is chlorine is chlorine. Everyone knows what it is and what it does. That doesn't mean everyone loves it! It's like taking medicine when you're sick. You want to get better so you take it but you hold your nose and swallow quickly in an effort to just to get it over with. Using chlorine is a little like that. It's assumed that's what you do if you own a pool or spa. You put gloves on before using then hold your breath and hope you don't spill any on your clothes! Each time you ask yourself, is there another way to do this?

There is another way. It's called fresh mineral water and it will change the way you feel about your pool or spa. Mineral water is easy on {skin} {suits }, helps protect surfaces and equipment and makes smelly pool or spa odors a thing of the past. Mineral water is refreshing and inviting because the level of chlorine in the water is greatly reduced.

Instead of a chlorine only treatment method, mineral water is a chlorine {enhancement} {alternative}. It takes what chlorine does like kill bacteria and provides what chlorine can't – soft water that's more enjoyable to swim and soak in

While chlorine has been a proven disinfectant in swimming pools and hot tubs since the 1920s, if left unchecked, it has a reputation for harshness. Anyone who has ever taken a dip in overly chlorinated water can tell you a few things about how it leaves their skin, their suits and the damage it can cause to surfaces or equipment. Most people say, "Oh well, that's just what you have to do, right?"

Wrong! There is {an alternative} {a better way} {an easier way} that cuts chlorine use up to 50% so water feels silky soft without bleaching swimming suits and with far less of those smelly odors! We call it mineral water because it uses minerals to keep the water fresh and clean. The end result is sparkling water that feels as good as it looks with far less chlorine!

We call it a chlorine {enhancement} {alternative} because when used with the EPA registered mineral formula, a low level of chlorine finishes the job without all the drawbacks. Your pool or spa experience is enhanced {with} {through} water that's clean and fresh with up to 50% less chlorine!
